

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Quarterly Period Ended 3/31/2018

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File No. 0-15950

FIRST BUSEY CORPORATION

(Exact name of registrant as specified in its charter)

Nevada
(State or other jurisdiction of incorporation
or organization)

37-1078406
(I.R.S. Employer Identification No.)

100 W. University Ave.
Champaign, Illinois
(Address of principal executive offices)

61820
(Zip code)

Registrant's telephone number, including area code: **(217) 365-4544**

N/A

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at May 8, 2018
Common Stock, \$.001 par value	48,723,534

FIRST BUSEY CORPORATION and Subsidiaries
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

The accompanying unaudited Consolidated Financial Statements of First Busey Corporation and its subsidiaries (“First Busey,” “Company,” “we,” or “our”), a Nevada corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) for interim financial information and with the instructions to Form 10-Q, and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles (“GAAP”) for complete Annual Financial Statements. Accordingly, these Financial Statements should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2017 on file with the SEC.

The accompanying Consolidated Balance Sheet as of December 31, 2017, which has been derived from audited Financial Statements, and the unaudited Consolidated Financial Statements have been prepared in accordance with GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations as of the dates and for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018.

The Company records revenue from contracts with customers in accordance with Accounting Standards Codification (“ASC”) *Topic 606, Revenue from Contracts with Customers* (“*Topic 606*”). *Topic 606* establishes principles for reporting information about the timing, nature, amount and uncertainty of revenue arising from the Company’s contracts to provide goods or services to customers. The Company’s revenue is comprised of net interest income, which is explicitly excluded from the scope of *Topic 606*, and non-interest income. The Company has evaluated its non-interest income and the nature of its contracts with customers and determined that further disaggregation of revenue beyond what is presented in the accompanying unaudited Consolidated Financial Statements was not necessary. The Company generally fully satisfies its performance obligations on its contracts with customers as services are

rendered so there is limited judgement involved in applying Topic 606 that significantly affects the determination of the timing and amount of revenue from contracts with customers.

Descriptions of the Company's primary revenue generating activities that are within Topic 606, and are presented in the accompanying unaudited Consolidated Statements of Income as components of non-interest income, include trust fees, commission and brokers' fees, net, remittance processing, and fees for customer services. Trust fees and commission and brokers' fees, net, represents monthly fees due from wealth management customers as consideration for managing the customers' assets. Wealth management and trust services include custody of assets, investment management, fees for trust services and other fiduciary activities. Also included are fees received from a third party broker-dealer as part of a revenue sharing agreement for fees earned from customers that the Company refers to the third party. Revenue is recognized when the performance obligation is completed, which is generally monthly. Remittance processing represents transaction-based fees for pay processing solutions such as online bill payments, lockbox and walk-in payments. Revenue is recognized when the performance obligation is completed, which is generally monthly. Fees for customer services represents general service fees for monthly account maintenance and activity or transaction-based fees and consists of transaction-based revenue, time-based revenue, or item-based revenue. Revenue is recognized when the performance obligation is completed which is generally monthly for account maintenance services or when a transaction has been completed. Payment for such performance obligations are generally received at the time the performance obligations are satisfied.

On July 2, 2017, First Busey acquired First Community Financial Partners, Inc., an Illinois corporation ("First Community"), and its wholly-owned bank subsidiary, First Community Financial Bank. First Busey operated First Community Financial Bank as a separate bank subsidiary from July 3, 2017 until November 3, 2017, when it was merged with and into Busey Bank. At that time, First Community Financial Bank's banking centers became banking centers of Busey Bank. On October 1, 2017, First Busey acquired Mid Illinois Bancorp, Inc., an Illinois corporation ("Mid Illinois") and its wholly-owned bank subsidiary, South Side Trust & Savings Bank of Peoria ("South Side Bank"). First Busey operated South Side Bank as a separate bank subsidiary from October 2, 2017 until March 16, 2018, when it was merged with and into Busey Bank. At that time, South Side Bank's banking centers became banking centers of Busey Bank. Their operating results are included in the Company's Financial Statements since each date of acquisition.

9

The Consolidated Financial Statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and balances have been eliminated in consolidation. Certain prior-year amounts have been reclassified to conform to the current presentation with no effect on net income or stockholders' equity.

In preparing the accompanying unaudited Consolidated Financial Statements, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the fair value of available for sale investment securities, the fair value of assets acquired and liabilities assumed in business combinations and the determination of the allowance for loan losses.

The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the unaudited Consolidated Financial Statements included in this Quarterly Report on Form 10-Q were issued. There were no significant subsequent events for the quarter ended March 31, 2018 through the issuance date of these unaudited Consolidated Financial Statements that warranted adjustment to or disclosure in the unaudited Consolidated Financial Statements.

Note 2: Acquisitions

First Community Financial Partners, Inc.

On July 2, 2017, the Company completed its acquisition of First Community, which was headquartered in Joliet, Illinois. Founded in 2004, First Community operated nine banking centers in Will, DuPage and Grundy Counties, which encompass portions of the southwestern suburbs of Chicago. The operating results of First Community are included with the Company's results of operations since the date of acquisition. First Busey operated First Community Financial Bank as a separate subsidiary from July 3, 2017 until November 3, 2017, when it was merged with and into Busey Bank. At that time, First Community Financial Bank's banking centers became banking centers of Busey Bank.

Under the terms of the merger agreement with First Community, at the effective time of the acquisition, each share of First Community common stock issued and outstanding was converted into the right to receive 0.396 shares of the Company's common stock, cash in lieu of fractional shares and \$1.35 cash consideration per share. The market value of the 7.2 million shares of First Busey common stock issued at the effective time of the acquisition was approximately \$211.1 million based on First Busey's closing stock price of \$29.32 on June 30, 2017. In addition, certain options to purchase shares of First Community common stock that were outstanding at the acquisition date were converted into options to purchase shares of First Busey common stock, adjusted for the 0.44 option exchange ratio, and the fair value was included in the purchase price. Further, the purchase price included cash payouts relating to unconverted stock options and restricted stock units outstanding as of the acquisition date.

This transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed, and consideration exchanged were recorded at their estimated fair values on the date of acquisition. Fair values are subject to refinement for up to one year after the closing date of July 2, 2017 as additional information regarding the closing date fair values become available; however, the Company does not expect any further adjustments will be necessary. The total consideration paid, which was used to determine the amount of goodwill resulting from the transaction, also included the fair value of outstanding First Community stock options that were converted into options to purchase common shares of First Busey and cash paid out relating to stock options and restricted stock units not converted. As the total consideration paid for First Community exceeded the net assets acquired, goodwill of \$116.0 million was recorded as a result of the acquisition. Goodwill recorded in the transaction, which reflected the synergies expected from the acquisition and the greater revenue opportunities from the Company's broader service capabilities in the Chicagoland area, is not tax deductible, and was assigned to the Banking operating segment.

First Busey incurred \$0.1 million and \$0.6 million of pre-tax expenses related to the acquisition of First Community for the three months ended March 31, 2018 and 2017, respectively, primarily for professional and legal fees, all of which are reported as a component of non-interest expense in the accompanying unaudited Consolidated Financial Statements.

The following table presents the fair value estimates of First Community assets acquired and liabilities assumed as of July 2, 2017 (*dollars in thousands*):

	<u>As Recorded by First Busey</u>
Assets acquired:	
Cash and cash equivalents	\$ 60,686
Securities	165,843
Loans held for sale	905
Portfolio loans	1,096,583
Premises and equipment	18,094
OREO	722
Other intangible assets	13,979
Other assets	41,755
Total assets acquired	<u>1,398,567</u>
Liabilities assumed:	
Deposits	1,134,355
Other borrowings	125,751
Other liabilities	11,862
Total liabilities assumed	<u>1,271,968</u>
Net assets acquired	<u>\$ 126,599</u>
Consideration paid:	
Cash	\$ 24,557
Cash payout of options and restricted stock units	6,182
Common stock	211,120
Fair value of stock options assumed	722
Total consideration paid	<u>242,581</u>
Goodwill	<u>\$ 115,982</u>

The loans acquired in this transaction were recorded at fair value with no carryover of any existing allowance for loan losses. Loans that were not deemed to be credit-impaired at the acquisition date were accounted for under Financial Accounting Standards Board (“FASB”) ASC 310-20, *Receivables-Nonrefundable Fees and Other Costs*, and were subsequently considered as part of the Company’s determination of the adequacy of the allowance for loan losses. Purchased credit-impaired (“PCI”) loans were accounted for under ASC 310-30, *Receivables — Loans and Debt Securities Acquired with Deteriorated Credit Quality*. As of the acquisition date, the aggregate principal outstanding and aggregate fair value of the acquired performing loans, including loans held for sale, both rounded to \$1.1 billion. The difference between the aggregate principal balance outstanding and aggregate fair value of \$14.4 million is expected to be accreted over the estimated four year remaining life of the respective loans in a manner that approximates the level yield method. As of the acquisition date, the aggregate principal balance outstanding of PCI loans totaled \$17.9 million and the aggregate fair value of PCI loans totaled \$12.5 million, which became such loans’ new carrying value. At March 31, 2018, PCI loans related to this transaction with a carrying value of \$5.1 million were outstanding, with the decrease relating to collections. For PCI loans, the difference between contractually required payments at the acquisition date and the cash flow expected to be collected is referred to as the non-accretable difference. Further, the excess of cash flows expected at acquisition over the fair value is referred to as the accretable yield. The accretable yield, as of the acquisition date, of \$0.6 million on PCI loans was expected to be recognized over the estimated four year remaining life of the respective loans in a manner that approximates the level yield method; however, \$0.2 million was accelerated in 2017 as a result of collections.

The following table provides the unaudited pro forma information for the results of operations for the three months ended March 31, 2017, as if the acquisition had occurred January 1, 2017. The pro forma results combine the historical results of First Community into the Company’s unaudited Consolidated Statements of Income, including the impact of purchase accounting adjustments for loan discount accretion, intangible assets amortization and deposit accretion, net of taxes. The pro forma results have been prepared for comparative purposes only and are not necessarily indicative of the results that would have been obtained had the acquisition actually occurred on January 1, 2017. No assumptions have been applied to the pro forma results of operations regarding possible revenue enhancements, expense efficiencies or asset dispositions. Only the merger related expenses that have been recognized are included in net income in the table below (*dollars in thousands, except per share amount*):

	Pro Forma Three Months Ended March 31, 2017	
Total revenues (net interest income plus non-interest income)	\$	74,885
Net income		19,111
Diluted earnings per common share		0.42

Mid Illinois Bancorp, Inc.

On October 1, 2017, the Company completed its acquisition of Mid Illinois, under which each share of Mid Illinois common stock issued and outstanding as of the effective time was converted into, at the election of the stockholder the right to receive, either (i) \$227.94 in cash, (ii) 7.5149 shares of the Company’s common stock, or (iii) mixed consideration of \$68.38 in cash and 5.2604 shares of the Company’s common stock, subject to certain adjustments and proration. In the aggregate, total consideration consisted of 70% stock and 30% cash. Mid Illinois stockholders electing the cash consideration option were subject to proration under the terms of the merger agreement with Mid Illinois and ultimately received a mixture of cash and stock consideration. First Busey operated South Side Bank as a separate bank subsidiary from October 2, 2017 until March 16, 2018, when it was merged with and into Busey Bank. At that time, South Side Bank’s banking centers became banking centers of Busey Bank.

This transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed, and consideration exchanged were recorded at their estimated fair values on the date of acquisition. An adjustment to the fair value was recorded in the first quarter of 2018 as additional information became available. Fair values are subject to refinement for up to one year after the closing date of October 1, 2017; however, the Company does not expect any further adjustments will be necessary. As the total consideration paid for Mid Illinois exceeded the net assets acquired, goodwill of \$48.9 million was recorded as a result of the acquisition. Goodwill recorded in the transaction, which reflected the synergies expected from the acquisition and expansion within the greater Peoria area, is not tax deductible, and was assigned to the Banking operating segment.

12

First Busey incurred \$3.0 million of pre-tax expenses related to the acquisition of Mid Illinois for the three months ended March 31, 2018, primarily for salaries, wages and employee benefits expense, professional and legal fees and data conversion expenses, all of which are reported as a component of non-interest expense in the accompanying unaudited Consolidated Financial Statements. First Busey incurred \$0.1 million of pre-tax expenses related to the acquisition of Mid Illinois for the three months ended March 31, 2017, primarily for legal fees, all of which are reported as a component of non-interest expense in the accompanying unaudited Consolidated Financial Statements.

The following table presents the fair value estimates of Mid Illinois assets acquired and liabilities assumed as of October 1, 2017 (*dollars in thousands*):

	As Recorded by First Busey
Assets acquired:	
Cash and cash equivalents	\$ 39,443
Securities	208,003
Loans held for sale	5,031
Portfolio loans	356,651
Premises and equipment	16,551
Goodwill	—
Other intangible assets	11,531
Other assets	29,564
Total assets acquired	<u>666,774</u>
Liabilities assumed:	
Deposits	505,917
Other borrowings	61,040
Other liabilities	10,497
Total liabilities assumed	<u>577,454</u>
Net assets acquired	<u>\$ 89,320</u>
Consideration paid:	
Cash	\$ 40,507
Common stock	97,702
Total consideration paid	<u>138,209</u>
Goodwill	<u>\$ 48,889</u>

13

The loans acquired in this transaction were recorded at fair value with no carryover of any existing allowance for loan losses. Loans that were not deemed to be credit-impaired at the acquisition date were accounted for under FASB ASC 310-20, *Receivables-Nonrefundable Fees and Other Costs*, and were subsequently considered as part of the Company's determination of the adequacy of the allowance for loan losses. PCI loans were accounted for under ASC 310-30, *Receivables — Loans and Debt Securities Acquired with Deteriorated Credit Quality*. As of the acquisition date, the aggregate principal outstanding was \$362.4 million and aggregate fair value of the acquired performing loans was \$357.0 million, including loans held for sale. The difference between the aggregate principal balance outstanding and aggregate fair value of \$5.4 million is expected to be accreted over the estimated four year remaining life of the respective loans in a manner that approximates the level yield method. As of the acquisition date, the aggregate principal balance outstanding of PCI loans totaled \$7.6 million and the aggregate fair value of PCI loans totaled \$4.7 million, which became such loans' new carrying value. At March 31, 2018, PCI loans related to this transaction with a carrying value of \$0.9 million were outstanding, with the decrease primarily relating to a loan sale. For PCI loans, the difference between contractually required payments at the acquisition date and the cash flow expected to be collected is referred to as the non-accretable difference. Further, the excess of cash flows expected at acquisition over the fair value is referred to as the accretable yield. The accretable yield, as of the acquisition date, of \$0.1 million on PCI loans was expected to be recognized over the estimated four year remaining life of the respective loans in a manner that approximates the level yield method.

Note 3: Recent Accounting Pronouncements

Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers (Topic 606)." ASU 2014-09 outlines a single model for companies to use in accounting for revenue arising from contracts with customers and supersedes most prior revenue recognition guidance, including industry-specific guidance. ASU 2014-09 requires that companies recognize revenue based on the value of transferred goods or services as they occur in the contract and also requires additional disclosures. The Company's revenue is comprised of net interest income, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. The adoption of this guidance on January 1, 2018 did not change the method in which non-interest income is recognized therefore a cumulative effect adjustment to retained earnings was not necessary. Additional disclosures related to revenue recognition appears in "Note 1: Basis of Presentation."

ASU 2016-01, “*Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities.*” ASU 2016-01 is intended to improve the recognition and measurement of financial instruments by, among other things, requiring: equity investments, with certain exceptions, to be measured at fair value with changes in fair value recognized in net income; to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; separate presentation of financial assets and financial liabilities by measurement category and form of financial assets; eliminating the requirement to disclose the method and significant assumptions used to estimate the fair value for financial instruments measured at amortized cost on the Balance Sheet; and requiring an entity to present separately in other comprehensive income (loss) the portion of the total change in fair value of a liability resulting from the change in the instrument-specific credit risk when the fair value option has been elected for the liability. ASU 2016-01 was effective on January 1, 2018 and the adoption of this guidance resulted in separate classification of equity securities previously included in available for sale securities on the Consolidated Financial Statements. There was no cumulative effect adjustment recorded with the adoption of this guidance.

ASU 2016-02, “*Leases (Topic 842).*” ASU 2016-02 intends to increase transparency and comparability among organizations by recognizing all lease transactions (with terms in excess of 12 months) on the Consolidated Balance Sheet as a lease liability and a right-of-use asset. The guidance also requires qualitative and quantitative disclosures designed to assess the amount, timing and uncertainty of cash flows arising from leases. This guidance is effective for annual reporting periods beginning after December 15, 2018, including interim periods within those fiscal years. Upon adoption, the lessee will apply the new standard retrospectively to all periods presented or retrospectively using a cumulative effect adjustment in the year of adoption. The Company is evaluating the impact this guidance will have on its Consolidated Financial Statements and related disclosures. The Company expects an increase in assets and liabilities as a result of recording additional lease contracts where the Company is lessee.

14

ASU 2016-13, “*Financial Instruments — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.*” ASU 2016-13 implements a comprehensive change in estimating impairment from the current model of losses inherent in loans and securities held to maturity. This current expected credit loss model is expected to result in earlier recognition of losses. ASU 2016-13 will be effective in the first quarter of 2020. The Company’s implementation team is analyzing the provisions of ASU 2016-13, including evaluating the impact this guidance will have on its Consolidated Financial Statements and related disclosures.

ASU 2017-04, “*Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment.*” ASU 2017-04 is intended to simplify goodwill impairment testing by eliminating the second step of the analysis. ASU 2017-04 requires entities to compare the fair value of a reporting unit with its carrying amount and recognize an impairment charge for any amount by which the carrying amount exceeds the reporting unit’s fair value, to the extent that the loss recognized does not exceed the amount of goodwill allocated to that reporting unit. This guidance is effective for annual and interim periods beginning after December 15, 2019, with early adoption permitted. The Company does not expect this guidance to have a material impact on its Consolidated Financial Statements.

ASU 2017-08, “*Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities.*” ASU 2017-08 shortens the amortization period for certain callable debt securities held at a premium, requiring the premium to be amortized to the earliest call date. ASU 2017-08 does not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. This guidance is effective for annual reporting periods beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The Company does not expect this guidance to have a material impact on its Consolidated Financial Statements.

ASU 2017-12, “*Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities.*” ASU 2017-12 amends Topic 815 to reduce the cost and complexity of applying hedge accounting and expand the types of relationships that qualify for hedge accounting. The guidance eliminates the requirement to separately measure and report hedge ineffectiveness, requires all items that affect earnings to be presented in the same income statement line as the hedged item, provides new alternatives for applying hedge accounting to additional hedging strategies and measuring the hedged item in fair value hedges of interest rate risk, and expects to reduce the cost and complexity of applying hedge accounting by easing the requirements for effective testing, hedge documentation and application of the critical terms match method, and reducing the risk of material error corrections if a company applies the shortcut method incorrectly. This guidance is effective for annual reporting periods beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The Company does not expect this guidance to have a material impact on its Consolidated Financial Statements.

ASU 2018-02, “*Income Statement—Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*” was issued in February 2018. ASU 2018-02 allows companies to make a one-time reclassification from accumulated other comprehensive income (loss) to retained earnings for the effects of remeasuring deferred tax liabilities and assets originally recorded in other comprehensive income as a result of the change in the federal tax rate by the TCJA. The Company adopted this guidance in the first quarter of 2018 with no impact on total stockholders’ equity or net income.

Note 4: Securities

The Company held equity securities, consisting of common stock and money market mutual funds, with fair values of \$5.0 million and \$5.4 million at March 31, 2018 and December 31, 2017, respectively. Money market mutual fund balances were \$4.3 million and \$4.6 million at March 31, 2018 and December 31, 2017, respectively. There was \$0.1 million of unrealized losses recorded in non-interest income in the accompanying unaudited Consolidated Financial Statements during the three months ended March 31, 2018 on the common stock. There were no sales of equity securities during the three months ended March 31, 2018.

Securities are classified as available for sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income. Securities are classified as held to maturity when First Busey has the ability and management has the intent to hold those securities to maturity. Accordingly, they are stated at cost, adjusted for amortization of premiums and accretion of discounts.

15

The amortized cost, unrealized gains and losses and fair values of securities are summarized as follows (*dollars in thousands*):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
March 31, 2018:				
Available for sale				
U.S. Treasury securities	\$ 61,005	\$ 2	\$ (943)	\$ 60,064
Obligations of U.S. government corporations and agencies (1)	97,967	—	(1,774)	96,193

Securities are periodically evaluated for other-than-temporary impairment (“OTTI”). The total number of securities in the investment portfolio in an unrealized loss position as of March 31, 2018 was 841, and represented a loss of 1.92% of the aggregate carrying value. As of March 31, 2018, the Company does not intend to sell such securities and it is more-likely-than-not that the Company will recover the amortized cost prior to being required to sell the securities. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Company does not consider these investments to be OTTI at March 31, 2018.

The Company had available for sale obligations of state and political subdivisions with a fair value of \$261.0 million and \$280.2 million as of March 31, 2018 and December 31, 2017, respectively. In addition, the Company had held to maturity obligations of state and political subdivisions with a fair value of \$40.4 million and \$41.5 million as of March 31, 2018 and December 31, 2017, respectively.

As of March 31, 2018, the fair value of the Company’s obligations of state and political subdivisions portfolio was comprised of \$252.6 million of general obligation bonds and \$48.8 million of revenue bonds issued by 430 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 36 states (including the District of Columbia), including eight states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 22 states, including three states where the aggregate fair value exceeded \$5.0 million.

As of December 31, 2017, the fair value of the Company’s obligations of state and political subdivisions portfolio was comprised of \$271.7 million of general obligation bonds and \$50.0 million of revenue bonds issued by 446 issuers, primarily consisting of states, counties, cities, towns, villages and school districts. The Company held investments in general obligation bonds in 36 states (including the District of Columbia), including nine states in which the aggregate fair value exceeded \$5.0 million. The Company held investments in revenue bonds in 22 states, including three states where the aggregate fair value exceeded \$5.0 million.

18

The amortized cost and fair values of the Company’s portfolio of general obligation bonds are summarized in the following tables by the issuers’ state (dollars in thousands):

March 31, 2018:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
Illinois	91	\$ 89,465	\$ 88,644	\$ 974
Wisconsin	36	23,792	23,583	655
Texas	46	25,760	25,421	553
Michigan	34	19,601	19,687	579
Ohio	20	15,120	14,962	748
Pennsylvania	18	11,011	10,984	610
New Jersey	14	6,340	6,298	450
Missouri	10	5,733	5,691	569
Other	96	58,012	57,306	597
Total general obligations bonds	365	\$ 254,834	\$ 252,576	\$ 692

December 31, 2017:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
Illinois	97	\$ 95,340	\$ 95,344	\$ 983
Wisconsin	41	27,852	27,809	678
Texas	46	27,485	27,514	598
Michigan	34	19,641	19,849	584
Ohio	20	15,172	15,162	758
Pennsylvania	18	12,189	12,174	676
New Jersey	15	7,755	7,760	517
Missouri	10	5,759	5,747	575
Minnesota	8	5,657	5,667	708
Other	92	54,649	54,633	594
Total general obligations bonds	381	\$ 271,499	\$ 271,659	\$ 713

The general obligation bonds are diversified across many issuers, with \$4.0 million being the largest exposure to a single issuer at March 31, 2018 and December 31, 2017. Accordingly, as of March 31, 2018 and December 31, 2017, the Company did not hold general obligation bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. Of the general obligation bonds in the Company's portfolio, 99.3% had been rated by at least one nationally recognized statistical rating organization and 0.7% were unrated, based on the aggregate fair value as of March 31, 2018 and December 31, 2017.

The amortized cost and fair values of the Company's portfolio of revenue bonds are summarized in the following tables by the issuers' state (*dollars in thousands*):

March 31, 2018:

U.S. State	Number of Issuers	Amortized Cost	Fair Value	Average Exposure Per Issuer (Fair Value)
Indiana	14	\$ 11,977	\$ 11,911	\$ 851

Other	38	24,163	24,158	636
Total revenue bonds	65	\$ 50,017	\$ 50,004	\$ 769

The revenue bonds are diversified across many issuers and revenue sources with \$3.5 million and \$3.6 million being the largest exposure to a single issuer at each of March 31, 2018 and December 31, 2017, respectively. Accordingly, as of March 31, 2018 and December 31, 2017, the Company did not hold revenue bonds of any single issuer, the aggregate book or market value of which exceeded 10% of the Company's stockholders' equity. Of the revenue bonds in the Company's portfolio, 99.4% had been rated by at least one nationally recognized statistical rating organization and 0.6% were unrated, based on the fair value as of March 31, 2018 and December 31, 2017. Some of the primary types of revenue bonds held in the Company's portfolio include: primary education or government building lease rentals secured by ad valorem taxes, utility systems secured by utility system net revenues, housing authorities secured by mortgage loans or principal receipts on mortgage loans, secondary education secured by student fees/tuitions, and pooled issuances (i.e. bond bank) consisting of multiple underlying municipal obligors.

At March 31, 2018, all of the Company's obligations of state and political subdivision securities are owned by its subsidiary bank, which has adopted First Busey's investment policy requiring that state and political subdivision securities purchased be investment grade. Such investment policy also limits the amount of rated state and political subdivision securities to an aggregate 100% of the subsidiary bank's total capital (as defined by federal regulations) at the time of purchase and an aggregate 15% of total capital for unrated state and political subdivision securities issued by municipalities having taxing authority or located in counties/micropolitan statistical areas/metropolitan statistical areas in which an office is located.

All securities in First Busey's obligations of state and political subdivision securities portfolio are subject to periodic review. Factors that may be considered as part of monitoring of state and political subdivision securities include credit rating changes by nationally recognized statistical rating organizations, market valuations, third-party municipal credit analysis, which may include indicative information regarding the issuer's capacity to pay, market and economic data and such other factors as are available and relevant to the security or the issuer such as its budgetary position and sources, strength and stability of taxes and/or other revenue.

Note 5: Loans held for sale

Loans held for sale totaled \$29.0 million and \$94.8 million at March 31, 2018 and December 31, 2017, respectively. The amount of loans held for sale decreased from December 31, 2017, due to lower origination volumes. Loans held for sale generate net interest income until loans are delivered to investors, at which point mortgage revenue will be recognized.

The following is a summary of mortgage revenue (*dollars in thousands*):

	Three Months Ended March 31,	
	2018	2017
Premiums received on sales of mortgage loans, including fair value adjustments	\$ 4,107	\$ 12,151
Less direct origination costs	(3,019)	(10,387)
Less provisions to liability for loans sold	(62)	(25)
Mortgage servicing revenues	617	395
Mortgage revenue	<u>\$ 1,643</u>	<u>\$ 2,134</u>

Note 6: Portfolio loans

Distributions of portfolio loans were as follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
Commercial	\$ 1,431,496	\$ 1,414,631
Commercial real estate	2,360,560	2,354,684
Real estate construction	269,125	261,506
Retail real estate	1,443,962	1,460,801
Retail other	26,310	27,878
Portfolio loans	<u>\$ 5,531,453</u>	<u>\$ 5,519,500</u>
Less allowance for loan losses	52,649	53,582
Portfolio loans, net	<u>\$ 5,478,804</u>	<u>\$ 5,465,918</u>

Net deferred loan origination costs included in the table above were \$4.5 million as of March 31, 2018 and \$4.1 million as of December 31, 2017. Net accretable purchase accounting adjustments included in the table above reduced loans by \$20.7 million as of March 31, 2018 and \$23.6 million as of December 31, 2017.

The Company believes that making sound loans is a necessary and desirable means of employing funds available for investment. Recognizing the Company's obligations to its stockholders, depositors, and to the communities it serves, authorized personnel are expected to seek to develop and make sound, profitable loans that resources permit and that opportunity affords. The Company maintains lending policies and procedures designed to focus lending efforts on the types, locations and duration of loans most appropriate for its business model and markets. While not specifically limited, the Company attempts to focus its lending on short to intermediate-term (0-7 years) loans in geographic areas within 125 miles of its lending offices. Loans might be originated outside of these areas, but such loans are generally residential mortgage loans originated for sale in the secondary market or are loans to existing customers of the Bank. The Company attempts to utilize government-assisted lending programs, such as the Small Business Administration and United States Department of Agriculture lending programs, when prudent. Generally, loans are collateralized by assets, primarily real estate, of the borrowers and guaranteed by individuals. The loans are expected to be repaid primarily from cash flows of the borrowers, or from proceeds from the sale of selected assets of the borrowers.

Management reviews and approves the Company's lending policies and procedures on a routine basis. The policies for legacy First Community and South Side Bank loans are similar in nature to Busey Bank's policies and the Company is migrating such loan production towards the Busey Bank policies. Management routinely (at least quarterly) reviews the Company's allowance for loan losses in conjunction with reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. The Company's underwriting standards are designed to encourage relationship banking rather than transactional banking. Relationship banking implies a primary banking relationship with the borrower that includes, at a minimum, an active deposit banking relationship in addition to the lending relationship. Additional significant underwriting factors beyond location, duration, a sound and profitable cash flow basis and the borrower's character include the quality of the borrower's financial history, the liquidity of the underlying collateral and the reliability of the valuation of the underlying collateral.

At no time is a borrower's total borrowing relationship permitted to exceed the Company's regulatory lending limit and the Company generally limits such relationships to amounts substantially less than the regulatory limit. Loans to related parties, including executive officers and directors of the Company and its subsidiaries, are reviewed for compliance with regulatory guidelines by the Company's board of directors at least annually.

The Company maintains an independent loan review department that reviews the loans for compliance with the Company's loan policy on a periodic basis. In addition, the loan review department reviews the risk assessments made by the Company's credit department, lenders and loan committees. Results of these reviews are presented to management and the audit committee at least quarterly.

The Company's lending activities can be summarized into five primary areas: commercial loans, commercial real estate loans, real estate construction loans, retail real estate loans, and retail other loans. A description of each of the lending areas can be found in the Company's Annual Report on Form 10-K for the year ended December 31, 2017. The significant majority of the Company's portfolio lending activity occurs in its Illinois and Missouri markets, with the remainder in the Indiana and Florida markets.

The Company utilizes a loan grading scale to assign a risk grade to all of its loans. A description of the general characteristics of each grade is as follows:

- *Pass*- This category includes loans that are all considered strong credits, ranging from investment or near investment grade, to loans made to borrowers who exhibit credit fundamentals that exceed industry standards and loan policy guidelines and loans that exhibit acceptable credit fundamentals.
- *Watch*- This category includes loans on management's "Watch List" and is intended to be utilized on a temporary basis for a pass grade borrower where a significant risk-modifying action is anticipated in the near future.
- *Special mention*- This category is for "Other Assets Specially Mentioned" loans that have potential weaknesses, which may, if not checked or corrected, weaken the asset or inadequately protect the Company's credit position at some future date.
- *Substandard*- This category includes "Substandard" loans, determined in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.
- *Doubtful*- This category includes "Doubtful" loans that have all the characteristics of a "Substandard" loan with additional factors that make collection in full highly questionable and improbable. Such loans are placed on non-accrual status and may be dependent on collateral with a value that is difficult to determine.

All loans are graded at their inception. Most commercial lending relationships that are \$1.0 million or less are processed through an expedited underwriting process. If the credit receives a pass grade, it is aggregated into a homogenous pool of either: \$0.35 million or less, or \$0.35 million to \$1.0 million. These pools are monitored on a regular basis and reviewed annually. Most commercial loans greater than \$1.0 million are included in a portfolio review at least annually. Commercial loans greater than \$0.35 million that have a grading of special mention or worse are reviewed on a quarterly basis. Interim reviews may take place if circumstances of the borrower warrant a more timely review.

Portfolio loans in the highest grades, represented by the pass and watch categories, totaled \$5.3 billion at March 31, 2018 and December 31, 2017. Portfolio loans in the lowest grades, represented by the special mention, substandard and doubtful categories, totaled \$223.0 million at March 31, 2018, compared to \$193.8 million at December 31, 2017.

The following table is a summary of risk grades segregated by category of portfolio loans (excluding accretable purchase accounting adjustments and non-posted and clearings) (*dollars in thousands*):

	March 31, 2018				
	Pass	Watch	Special Mention	Substandard	Doubtful
Commercial	\$ 1,195,019	\$ 127,638	\$ 48,919	\$ 52,359	\$ 9,927
Commercial real estate	2,164,692	125,008	26,745	43,116	13,269
Real estate construction	220,493	42,085	4,016	2,463	868
Retail real estate	1,411,995	9,069	7,980	4,792	8,506
Retail other	26,666	—	7	7	18
Total	<u>\$ 5,018,865</u>	<u>\$ 303,800</u>	<u>\$ 87,667</u>	<u>\$ 102,737</u>	<u>\$ 32,588</u>

	December 31, 2017				
	Pass	Watch	Special Mention	Substandard	Doubtful
Commercial	\$ 1,175,421	\$ 141,776	\$ 51,366	\$ 43,933	\$ 5,285
Commercial real estate	2,169,420	130,056	21,151	36,482	11,997
Real estate construction	212,952	41,292	3,880	3,071	608
Retail real estate	1,436,156	6,883	5,162	4,135	6,714
Retail other	28,300	9	—	7	20
Total	<u>\$ 5,022,249</u>	<u>\$ 320,016</u>	<u>\$ 81,559</u>	<u>\$ 87,628</u>	<u>\$ 24,624</u>

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received in excess of the principal due. Loans may be returned to accrual status when all of the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

An analysis of portfolio loans that are past due and still accruing or on a non-accrual status is as follows (*dollars in thousands*):

	March 31, 2018			
	Loans past due, still accruing			Non-accrual Loans
	30-59 Days	60-89 Days	90+Days	
Commercial	\$ 416	\$ 969	\$ —	\$ 9,927
Commercial real estate	578	421	175	13,269
Real estate construction	—	—	—	868
Retail real estate	5,592	1,513	799	8,506
Retail other	15	2	21	18
Total	<u>\$ 6,601</u>	<u>\$ 2,905</u>	<u>\$ 995</u>	<u>\$ 32,588</u>

	December 31, 2017			
	Loans past due, still accruing			Non-accrual Loans
	30-59 Days	60-89 Days	90+Days	
Commercial	\$ 1,615	\$ 323	\$ 1,808	\$ 5,285
Commercial real estate	1,856	2,737	—	11,997
Real estate construction	—	—	—	608
Retail real estate	4,840	1,355	933	6,714
Retail other	166	5	—	20
Total	<u>\$ 8,477</u>	<u>\$ 4,420</u>	<u>\$ 2,741</u>	<u>\$ 24,624</u>

A loan is classified as impaired when, based on current information and events, it is probable the Company will be unable to collect scheduled principal and interest payments when due according to the terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Loans graded substandard or doubtful and loans classified as a troubled debt restructuring ("TDR") are reviewed by the Company for potential impairment.

Impairment is measured on a loan-by-loan basis for commercial and construction loans based on the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. PCI loans are considered impaired. Large groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment unless such loans are the subject of a restructuring agreement.

The gross interest income that would have been recorded in the three months ended March 31, 2018 if impaired loans had been current in accordance with their original terms was \$0.4 million. The amount of interest collected on those loans and recognized on a cash basis that was included in interest income was insignificant for the three months ended March 31, 2018.

The Company's loan portfolio includes certain loans that have been modified in a TDR, where concessions have been granted to borrowers who have experienced financial difficulties. The Company will restructure a loan for its customer after evaluating whether the borrower is able to meet the terms of the loan over the long term, though unable to meet the terms of the loan in the near term due to individual circumstances.

The Company considers the customer's past performance, previous and current credit history, the individual circumstances surrounding the customer's current difficulties and the customer's plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. Generally, all five primary areas of lending are restructured through short-term interest rate relief, short-term principal payment relief, short-term principal and interest payment relief or forbearance (debt forgiveness). Once a restructured loan exceeds 90 days past due or is placed on non-accrual status, it is classified as non-performing. A summary of restructured loans as of March 31, 2018 and December 31, 2017 is as follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
In compliance with modified terms	\$ 9,297	\$ 9,873
30 – 89 days past due	78	108
Included in non-performing loans	1,975	1,919
Total	<u>\$ 11,350</u>	<u>\$ 11,900</u>

All TDRs are considered to be impaired for purposes of assessing the adequacy of the allowance for loan losses and for financial reporting purposes. When the Company modifies a loan in a TDR, it evaluates any possible impairment similar to other impaired loans based on present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the Company determines that the fair value of the TDR is less than the recorded investment in the loan, impairment is recognized through an allowance estimate in the period of the modification and in periods subsequent to the modification.

There were no performing loans classified as a TDR during the three months ended March 31, 2018 and 2017.

The gross interest income that would have been recorded in the three months ended March 31, 2018 and 2017 if performing TDRs had been performing in accordance with their original terms compared with their modified terms was insignificant.

There were no TDRs that were entered into during the last twelve months that were subsequently classified as non-performing and had payment defaults (a default occurs when a loan is 90 days or more past due or transferred to non-accrual) during the three months ended March 31, 2018. There were no TDRs that were entered into during the prior twelve months that were subsequently classified as non-performing and had payment defaults during the three months ended March 31, 2017.

The following tables provide details of impaired loans, segregated by category. The unpaid contractual principal balance represents the recorded balance prior to any partial charge-offs. The recorded investment represents customer balances net of any partial charge-offs recognized on the loan. The average recorded investment is calculated using the most recent four quarters (*dollars in thousands*).

March 31, 2018						
	Unpaid Contractual Principal Balance	Recorded Investment with No Allowance	Recorded Investment with Allowance	Total Recorded Investment	Related Allowance	Average Recorded Investment
Commercial	\$ 12,474	\$ 6,772	\$ 3,297	\$ 10,069	\$ 2,298	\$ 9,818
Commercial real estate	22,374	17,251	2,545	19,796	1,045	16,724

Total	<u>\$ 52,419</u>	<u>\$ 39,657</u>	<u>\$ 2,180</u>	<u>\$ 41,837</u>	<u>\$ 867</u>	<u>\$ 39,124</u>

Management's evaluation as to the ultimate collectability of loans includes estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

Allowance for Loan Losses

The allowance for loan losses represents an estimate of the amount of probable losses believed to be inherent in the Company's loan portfolio at the Consolidated Balance Sheet date. The allowance for loan losses is calculated geographically, by class of loans. The allowance calculation involves a high degree of estimation that management attempts to mitigate through the use of objective historical data where available. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Overall, the Company believes the allowance methodology is consistent with prior periods and the balance was adequate to cover the estimated losses in the Company's loan portfolio at March 31, 2018 and December 31, 2017.

The general portion of the Company's allowance contains two components: (i) a component for historical loss ratios, and (ii) a component for adversely graded loans. The historical loss ratio component is an annualized loss rate calculated using a sum-of-years digits weighted 20-quarter historical average.

The Company's component for adversely graded loans attempts to quantify the additional risk of loss inherent in the special mention and substandard portfolios. The substandard portfolio has an additional allocation of 3.00% placed on such loans, which is an estimate of the additional loss inherent in these loan grades based upon a review of overall historical charge-offs. As of March 31, 2018, the Company believed this reserve remained adequate. Special mention loans have an additional allocation of 1.0% placed on such loans, which is an estimate of the additional loss inherent in these loan grades. As of March 31, 2018, the Company believed this reserve remained adequate.

The specific portion of the Company's allowance relates to loans that are impaired, which includes non-performing loans, TDRs and other loans determined to be impaired. Impaired loans are excluded from the determination of the general allowance for non-impaired loans and are allocated specific reserves as discussed above.

Impaired loans are reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Collateral values are estimated using a combination of observable inputs, including recent appraisals discounted for collateral specific changes and current market conditions, and unobservable inputs based on customized discounting criteria.

The general reserve quantitative allocation that is based upon historical charge off rates is adjusted for qualitative factors based on current general economic conditions and other qualitative risk factors both internal and external to the Company. In general, such valuation allowances are determined by evaluating, among other things: (i) Management & Staff; (ii) Loan Underwriting, Policy and Procedures; (iii) Internal/External Audit & Loan Review; (iv) Valuation of Underlying Collateral; (v) Macro and Local Economic Factors; (vi) Impact of Competition, Legal & Regulatory Issues; (vii) Nature and Volume of Loan Portfolio; (viii) Concentrations of Credit; (ix) Net Charge-Off Trends; and (x) Non-Accrual, Past Due and Classified Trends. Management evaluates the probable impact from the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis.

Based on each component's risk factor, a qualitative adjustment to the reserve may be applied to the appropriate loan categories. During the first quarter of 2018, the Company adjusted qualitative factors for Impact of Competition, Legal & Regulatory and Net Charge-Off Trends based on current analysis. The Company will continue to monitor its qualitative factors on a quarterly basis.

The Company holds acquired loans from business combinations with uncollected principal balances. These loans are carried net of a fair value adjustment for credit risk and interest rates and are only included in the allowance calculation to the extent that the reserve requirement exceeds the fair value adjustment. However, as the acquired loans renew, it is generally necessary to establish an allowance, which represents an amount that, in management's opinion, will be adequate to absorb probable credit losses in such loans. The balance of all acquired loans which did not require a related allowance for loan losses as of March 31, 2018 totaled approximately \$1.7 billion.

The following table details activity in the allowance for loan losses. Allocation of a portion of the allowance to one category does not preclude its availability to absorb losses in other categories (*dollars in thousands*):

	As of and for the Three Months Ended March 31, 2018					
	Commercial	Commercial Real Estate	Real Estate Construction	Retail Real Estate	Retail Other	Total
Beginning balance	\$ 14,779	\$ 21,813	\$ 2,861	\$ 13,783	\$ 346	\$ 53,582
Provision for loan loss	3,003	1,536	2	(3,662)	129	1,008
Charged-off	(781)	(1,315)	(97)	(530)	(207)	(2,930)

27

Note 7: OREO

OREO represents properties acquired through foreclosure or other proceedings in settlement of loans and is included in other assets in the accompanying Consolidated Balance Sheets. OREO is held for sale and is recorded at the date of foreclosure at the fair value of the properties less estimated costs of disposal, which establishes a new cost basis. Any adjustment to fair value at the time of transfer to OREO is charged to the allowance for loan losses. Properties are evaluated regularly to ensure each recorded amount is supported by its current fair value, and valuation allowances to reduce the carrying amount due to subsequent declines in fair value less estimated costs to dispose are recorded as necessary. Revenue, expense, gains and losses from the operations of foreclosed assets are included in operations. At March 31, 2018, the Company held \$0.7 million in commercial OREO, \$0.3 million in residential OREO and an insignificant amount of other repossessed assets. At December 31, 2017, the Company held \$1.2 million in commercial OREO, \$0.1 million in residential OREO and an insignificant amount of other repossessed assets. At March 31, 2018 the Company had \$2.0 million of residential real estate in the process of foreclosure.

The following table summarizes activity related to OREO (*dollars in thousands*):

	Three Months Ended March 31, 2018	Year Ended December 31, 2017
Beginning balance	\$ 1,283	\$ 2,518
Additions, transfers from loans	348	1,417
Additions, fair value from First Community acquisition	—	722
Additions, fair value from Mid Illinois acquisition	—	60
Proceeds from sales of OREO	(639)	(5,024)
Gain on sales of OREO	9	1,632
Valuation allowance for OREO	—	(42)
Ending balance	<u>\$ 1,001</u>	<u>\$ 1,283</u>

Note 8: Deposits

The composition of deposits is as follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
Demand deposits, noninterest-bearing	\$ 1,651,333	\$ 1,597,421
Interest-bearing transaction deposit	1,212,324	1,166,170
Saving deposits and money market deposits	2,058,639	2,026,212
Time deposits	1,408,878	1,336,162
Total	<u>\$ 6,331,174</u>	<u>\$ 6,125,965</u>

Interest-bearing transaction deposits included \$48.2 million and \$45.4 million of brokered transaction deposits, including reciprocal brokered deposits, at March 31, 2018 and December 31, 2017, respectively. Savings deposits and money market deposits included \$127.3 million and \$127.5 million of brokered deposits, including reciprocal brokered deposits, at March 31, 2018 and December 31, 2017, respectively.

The aggregate amount of time deposits with a minimum denomination of \$100,000 was approximately \$570.8 million and \$578.9 million at March 31, 2018 and December 31, 2017, respectively. The aggregate amount of time deposits with a minimum denomination that meets or exceeds the Federal Deposit Insurance Corporation ("FDIC") insurance limit of \$250,000 was approximately \$224.1 million and \$197.9 million at March 31, 2018 and December 31, 2017, respectively. The Company held reciprocal brokered time deposits of \$59.1 million and \$62.0 million at March 31, 2018 and December 31, 2017, respectively, included in the balance of time deposits. Further, the Company held brokered deposits of \$250.0 million and \$247.7 million at March 31, 2018 and December 31, 2017, respectively, which are included in the balance of time deposits.

As of March 31, 2018, the scheduled maturities of time deposits, are as follows (*dollars in thousands*):

April 1, 2018 – March 31, 2019	\$ 949,961
April 1, 2019 – March 31, 2020	302,299
April 1, 2020 – March 31, 2021	60,717
April 1, 2021 – March 31, 2022	50,556
April 1, 2022 – March 31, 2023	45,273
Thereafter	72
	<u>\$ 1,408,878</u>

Note 9: Borrowings

Securities sold under agreements to repurchase, which are classified as secured borrowings, generally mature either daily. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The underlying securities are held by the Company's safekeeping agent. The Company may be required to provide additional collateral based on fluctuations in the fair value of the underlying securities.

Short-term borrowings include FHLB advances which mature in less than one year from date of origination.

On May 5, 2017, the Company entered into a second amendment to a credit agreement with a correspondent bank to extend a revolving loan facility to the Company in the maximum principal amount of \$40.0 million, with an annual interest rate of 2.50% plus the one-month LIBOR rate, which had a maturity date of April 30, 2018. The Company had no outstanding amount on March 31, 2018 or December 31, 2017. On April 30, 2018, the Company entered into a third amendment to extend the maturity of this revolving loan facility from April 30, 2018 to April 30, 2019, decrease the maximum principal amount from \$40.0 million to \$20.0 million, and amend and restate the LIBOR rate definition to an annual interest rate of 1.75% plus the one-month LIBOR rate. The loan also bears a non-usage fee calculated based on the average daily principal balance of the loan outstanding during the prior fiscal quarter.

The following table sets forth the distribution of securities sold under agreements to repurchase and short-term borrowings and weighted average interest rates (dollars in thousands):

	March 31, 2018	December 31, 2017
Securities sold under agreements to repurchase		
Balance at end of period	\$ 235,311	\$ 304,566
Weighted average interest rate at end of period	0.55%	0.57%
Maximum outstanding at any month end in year-to-date period	\$ 267,596	\$ 304,566
Average daily balance for the year-to-date period	\$ 258,049	\$ 213,527
Weighted average interest rate during period(1)	0.54%	0.46%
Short-term borrowings, FHLB advances		
Balance at end of period	\$ —	\$ 220,000
Weighted average interest rate at end of period	—%	1.42%
Maximum outstanding at any month end in year-to-date period	\$ 180,000	\$ 234,600
Average daily balance for the year-to-date period	\$ 123,889	\$ 84,201
Weighted average interest rate during period(1)	1.48%	1.20%

(1) The weighted average interest rate is computed by dividing total annualized interest for the year-to-date period by the average daily balance outstanding.

Long-term debt is summarized as follows (dollars in thousands):

	March 31, 2018	December 31, 2017
Notes payable, FHLB, ranging in original maturity from nineteen months to ten years, collateralized by FHLB deposits, residential and commercial real estate loans and FHLB stock.	\$ 50,000	\$ 50,000

29

As of March 31, 2018, funds borrowed from the FHLB, listed above, consisted of variable-rate notes maturing through September 2024, with interest rates ranging from 1.40% to 1.71%. The weighted average rate on the long-term advances was 1.52% as of March 31, 2018. As of December 31, 2017, funds borrowed from the FHLB, listed above, consisted of variable-rate notes maturing through September 2024, with interest rates ranging from 1.10% to 1.32%. The weighted average rate on the long-term advances was 1.19% as of December 31, 2017.

On May 25, 2017, the Company issued \$40.0 million of 3.75% senior notes that mature on May 25, 2022. The senior notes are payable semi-annually on each May 25 and November 25, commencing on November 25, 2017. Additionally, on May 25, 2017, the Company issued \$60.0 million of fixed-to-floating rate subordinated notes that mature on May 25, 2027. The subordinated notes, which qualify as Tier 2 capital for First Busey, are at an initial rate of 4.75% for five years and thereafter at an annual floating rate equal to three-month LIBOR plus a spread of 2.919%. The subordinated notes are payable semi-annually on each May 25 and November 25, commencing on November 25, 2017 during the five year fixed-term and thereafter each February 25, May 25, August 25 and November 25 of each year, commencing on August 25, 2022. The subordinated notes have an optional redemption in whole or in part on any interest payment date on or after May 25, 2022. The senior notes and subordinated notes are unsecured obligations of the Company. Unamortized debt issuance costs related to the senior notes and subordinated notes totaled \$0.6 million and \$0.9 million, respectively, at March 31, 2018. Unamortized debt issuance costs related to the senior notes and subordinated notes totaled \$0.6 million and \$1.0 million, respectively, at December 31, 2017. The Company used the net proceeds from the offering to finance a portion of the cash consideration for its acquisition of First Community, to redeem a portion of First Community subordinated debentures in July 2017, and to finance a portion of the cash consideration for its acquisition of Mid Illinois in October 2017, with the remaining proceeds to be used for general corporate purposes.

In relation to the First Community acquisition, the Company assumed \$15.3 million in subordinated debt, of which \$9.8 million was simultaneously redeemed. The remaining \$5.5 million was issued on September 30, 2013, matures on September 30, 2021 and bears interest payable quarterly, at an annual interest rate of 8.625%. Beginning on September 30, 2018, the Company may, at its option, redeem the note at a redemption price equal to the principal amount outstanding plus accrued but unpaid interest. A \$0.3 million purchase accounting premium was recorded on the remaining subordinated debt.

Note 10: Junior Subordinated Debt Owed to Unconsolidated Trusts

First Busey maintains statutory trusts for the sole purpose of issuing and servicing trust preferred securities and related trust common securities. The proceeds from such issuances were used by the trusts to purchase junior subordinated notes of the Company, which are the sole assets of each trust. Concurrent with the issuance of the trust preferred securities, the Company issued guarantees for the benefit of the holders of the trust preferred securities. The trust preferred securities are instruments that qualify, and are treated by the Company, as Tier 1 regulatory capital. The Company owns all of the common securities of each trust. The trust preferred securities issued by each trust rank equally with the common securities in right of payment, except that if an event of default under the indenture governing the notes has occurred and is continuing, the preferred securities will rank senior to the common securities in right of payment. The Company had \$71.0 million of junior subordinated debt owed to unconsolidated trusts at March 31, 2018 and December 31, 2017.

The trust preferred securities are subject to mandatory redemption, in whole or in part, upon repayment of the junior subordinated notes at par value at the stated maturity date or upon redemption. Each trust's ability to pay amounts due on the trust preferred securities is solely dependent upon the Company making payment on the related junior subordinated notes. The Company's obligations under the junior subordinated notes and other relevant trust agreements, in aggregate, constitute a full and unconditional guarantee by the Company of each trust's obligations under the trust preferred securities issued by each trust. The Company has the right to defer payment of interest on the notes, in which case the distributions on the trust preferred securities will also be deferred, for up to five years, but not beyond the stated maturity date.

Under current banking regulations, bank holding companies are allowed to include qualifying trust preferred securities in their Tier 1 Capital for regulatory capital purposes, subject to a 25% limitation to all core (Tier 1) capital elements, net of goodwill and other intangible assets less any associated deferred tax liability. As of March 31, 2018, 100% of the trust preferred securities qualified as Tier 1 capital under the final rule adopted in March 2005.

The Dodd-Frank Act mandated the Federal Reserve to establish minimum capital levels for holding companies on a consolidated basis as stringent as those required for FDIC-insured institutions. A result of this change is that the proceeds of hybrid instruments, such as trust preferred securities, are being excluded from capital over a phase-out period. However, if such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15.0 billion of assets, they may be retained, subject to certain restrictions. Because the Company has assets of less than \$15.0 billion, it is able to maintain our trust preferred proceeds as capital, but the Company has to comply with new capital mandates in other respects and will not be able to raise capital in the future through the issuance of trust preferred securities.

Note 11: Earnings Per Common Share

Earnings per common share have been computed as follows (*in thousands, except per share data*):

	Three Months Ended	
	March 31,	
	2018	2017
Net income	\$ 21,917	\$ 15,170
Shares:		
Weighted average common shares outstanding	48,775	38,293
Dilutive effect of outstanding options, warrants and restricted stock units as determined by the application of the treasury stock method	404	461
Weighted average common shares outstanding, as adjusted for diluted earnings per share calculation	49,179	38,754
Basic earnings per common share	\$ 0.45	\$ 0.40
Diluted earnings per common share	\$ 0.45	\$ 0.39

Basic earnings per share are computed by dividing net income available to common stockholders for the period by the weighted average number of common shares outstanding, which include deferred stock units that are vested but not delivered.

Diluted earnings per common share are computed using the treasury stock method and reflects the potential dilution that could occur if the Company's outstanding stock options and warrants were exercised and restricted stock units were vested. Stock options, warrants and restricted stock units for which the exercise or the grant price exceeds the average market price over the period have an anti-dilutive effect and are excluded from the calculation. At March 31, 2018, 191,278 warrants were anti-dilutive and excluded from the calculation of common stock equivalents. At March 31, 2017, 10,850 outstanding options and 191,278 warrants were anti-dilutive and excluded from the calculation of common stock equivalents.

Note 12: Share-based Compensation

The Company grants share-based compensation awards to its employees and members of its board of directors as provided for under the Company's 2010 Equity Incentive Plan. In addition, pursuant to the terms of the First Community 2016 Equity Incentive Plan, the Company may grant awards with respect to First Busey common stock to legacy employees and directors of First Community or its subsidiaries. Permissible awards under the plan include, but are not limited to, non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock and restricted stock units.

The Company currently grants share-based compensation in the form of restricted stock units ("RSUs") and deferred stock units ("DSUs"). The Company grants RSUs to members of management periodically throughout the year. Each RSU is equivalent to one share of the Company's common stock. These units have a requisite service periods ranging from one to five years. The Company annually grants share-based awards in the form of DSUs, which are RSUs with a deferred settlement date, to its board of directors. Each DSU is equivalent to one share of the Company's common stock. The DSUs vest on the first anniversary of the grant date or on the date of the next Annual Meeting of Stockholders, whichever is earlier. These units generally are subject to the same terms as RSUs under the Company's 2010 Equity Incentive Plan or the First Community 2016 Equity Incentive Plan, except that, following vesting, settlement occurs within 30 days following the earlier of separation from the board or a change in control of the Company. Subsequent to vesting and prior to delivery, these units will continue to earn dividend equivalents. The Company also has outstanding stock options granted prior to 2011 and stock options assumed with previous acquisitions.

Under the terms of the Company's 2010 Equity Incentive Plan and the First Community 2016 Equity Incentive Plan, the Company is allowed, but not required, to source stock option exercises and grants of RSUs and DSUs from its inventory of treasury stock. As of March 31, 2018, the Company held 468,342 shares in treasury. On February 3, 2015, First Busey announced that its board of directors approved a repurchase plan under which the Company is authorized to repurchase up to an aggregate of 666,667 shares of its common stock. The repurchase plan has no expiration date and replaced the prior repurchase plan originally approved in 2008. During 2015, the Company purchased 333,333 shares under this repurchase plan. At March 31, 2018 the Company had 333,334 shares that may still be purchased under the plan.

The Company's 2010 Equity Incentive Plan is designed to encourage ownership of its common stock by its employees and directors, to provide additional incentive for them to promote the success of the Company's business, and to attract and retain talented personnel. All of the Company's employees and directors, and those of its subsidiaries, are eligible to receive awards under the plan.

A description of the 2010 Equity Incentive Plan, which was amended in 2015, can be found in the Company's Proxy Statement for the 2015 Annual Meeting of Stockholders. A description of the First Community 2016 Equity Incentive Plan can be found in the Proxy Statement of First Community Financial Partners, Inc. for the 2016 Annual Meeting of Stockholders.

Stock Option Plan

A summary of the status of and changes in the Company's stock option awards for the three months ended March 31, 2018 follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding at beginning of year	213,428	\$ 16.97	
Exercised	(34,369)	13.62	
Forfeited	(6,985)	20.72	
Expired	(2,171)	16.48	
Outstanding at end of period	169,903	\$ 17.50	4.27
Exercisable at end of period	126,987	\$ 15.47	2.80

The Company recorded \$0.1 million stock option compensation expense for the three months ended March 31, 2018 related to the converted options from First Community. The Company did not record any stock option compensation expense for the three months ended March 31, 2017. As of March 31, 2018, the Company had \$0.4 million of unrecognized stock option expense. This cost is expected to be recognized over a period of 1.6 years.

Restricted Stock Unit Plan

A summary of the changes in the Company's stock unit awards for the three months ended March 31, 2018, is as follows:

	Restricted Stock Units	Weighted-Average Grant Date Fair Value	Director Deferred Stock Units	Weighted-Average Grant Date Fair Value
Non-vested at beginning of year	587,763	\$ 22.68	42,411	\$ 25.47
Granted	—	—	—	—
Dividend equivalents earned	3,765	31.18	770	31.18
Vested	—	—	(498)	31.18
Forfeited	(834)	30.33	—	—
Non-vested at end of period	590,694	\$ 22.72	42,683	\$ 25.51
Outstanding at end of period	590,694	\$ 22.72	120,755	\$ 21.06

Recipients earn quarterly dividend equivalents on their respective units which entitle the recipients to additional units. Therefore, dividends earned each quarter compound based upon the updated unit balances. Upon vesting/delivery, shares are expected (though not required) to be issued from treasury.

The Company recognized \$0.8 million and \$0.5 million of compensation expense related to non-vested RSUs and DSUs for the three months ended March 31, 2018 and 2017, respectively. As of March 31, 2018, there was \$7.7 million of total unrecognized compensation cost related to these non-vested RSUs and DSUs. This cost is expected to be recognized over a period of 3.4 years.

As of March 31, 2018, 891,648 shares remain available for issuance pursuant to the Company's 2010 Equity Incentive Plan, 78,690 shares remain available for issuance pursuant to the Company's Employee Stock Purchase Plan and 313,939 shares remain available for issuance pursuant to the First Community 2016 Equity Incentive Plan.

Note 13: Income Taxes

At March 31, 2018, the Company was not under examination by any tax authority.

Note 14: Outstanding Commitments and Contingent Liabilities

Legal Matters

The Company is a party to legal actions which arise in the normal course of its business activities. In the opinion of management, the ultimate resolution of these matters is not expected to have a material effect on the financial position or the results of operations of the Company.

Credit Commitments and Contingencies

The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the unaudited Consolidated Balance Sheets.

The Company's exposure to credit loss is represented by the contractual amount of those commitments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. A summary of the contractual amount of the Company's exposure to off-balance-sheet risk relating to the Company's commitments to extend credit and standby letters of credit follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$ 1,352,821	\$ 1,300,294

Commitments to extend credit are agreements to lend to a customer as long as no condition established in the contract has been violated. These commitments are generally at variable interest rates and generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer's obligation to a third-party. Those guarantees are primarily issued to support public and private borrowing arrangements, including bond financing and similar transactions and primarily have terms of one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds collateral, which may include accounts receivable, inventory, property and equipment, and income producing properties, supporting those commitments if deemed necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third-party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount shown in the summary above. If the commitment is funded, the Company would be entitled to seek recovery from the customer. As of March 31, 2018 and December 31, 2017, no amounts were recorded as liabilities for the Company's potential obligations under these guarantees.

Other Commitments

From time to time, the Company will sign contracts for construction projects relating to the Company's facilities.

Note 15: Capital

The ability of the Company to pay cash dividends to its stockholders and to service its debt was historically dependent on the receipt of cash dividends from its subsidiaries. Under applicable regulatory requirements, an Illinois state-chartered bank such as Busey Bank may not pay dividends in excess of its net profits. Because Busey Bank has been in a retained earnings deficit position since 2009, it has not been able to pay dividends since that time. With prior approval from its regulators, however, an Illinois state-chartered bank in this situation may be able to reduce its capital stock by amending its charter to decrease the authorized number of shares, and then make a subsequent distribution to its holding company. Using this approach, and with the approval of its regulators, Busey Bank has distributed funds to the Company, the most recent of which was \$40.0 million on October 12, 2017. The Company expects to seek regulatory approval for additional capital distributions from Busey Bank in future periods until such time as Busey Bank is no longer in a retained earnings deficit.

The Company and Busey Bank are subject to regulatory capital requirements administered by federal and/or state agencies that involve the quantitative measure of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Quantitative measures established by regulations to ensure capital adequacy require the Company and Busey Bank to maintain minimum dollar amounts and ratios of such to risk weighted assets (as defined in the regulations and set forth in the table below) of total capital, Tier 1 capital and Common Equity Tier 1 capital, and for the bank, Tier 1 capital to average assets. Failure to meet minimum capital requirements may cause regulatory bodies to initiate certain discretionary and/or mandatory actions that, if undertaken, could have a direct material effect on our unaudited Consolidated Financial Statements. The Company, as a financial holding company, is required to be "well capitalized" in the capital categories shown in the table below. As of March 31, 2018, the Company and Busey Bank met all capital adequacy requirements to which they were subject, including the guidelines to be considered "well capitalized."

The Dodd-Frank Act established minimum capital levels for bank holding companies on a consolidated basis. The components of Tier 1 capital are restricted to capital instruments that, at the time of signing, were considered to be Tier 1 capital for insured depository institutions. Under this legislation, the Company is able to maintain its trust preferred securities as Tier 1 capital, but it will have to comply with new capital mandates in other respects, and it will not be able to raise Tier 1 capital through the issuance of trust preferred securities in the future.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III Rule required by the Dodd-Frank Act. The Basel III Rule is applicable to all U.S. banks that are subject to minimum capital requirements, as well as to bank and savings and loan holding companies other than "small bank holding companies" (generally non-public bank holding companies with consolidated assets of less than \$1.0 billion). The Basel III Rule not only increased most of the required minimum regulatory capital ratios, but they also introduced a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer.

The Basel III Rule also expanded the definition of capital as in effect currently by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that generally qualified as Tier 1 Capital under the old guidelines no longer qualify, or their qualifications will change, as the Basel III Rule is being fully implemented.

The Basel III Rule also permitted banking organizations with less than \$15.0 billion in assets to retain, through a one-time election, the past treatment for accumulated other comprehensive income (loss), which did not affect regulatory capital. First Busey and Busey Bank made this election in the first quarter of 2015 to avoid variations in the level of their capital depending on fluctuations in the fair value of their securities portfolio. The Basel III Rule maintained the general structure of the prompt corrective action framework, while incorporating increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. Under the final capital rules that became effective on January 1, 2015, there was a requirement for a Common Equity Tier 1 capital conservation buffer of 2.5% of risk weighted assets which is in addition to the other minimum risk based capital standards in the rule. Failure to maintain the buffer will result in restrictions on the Company's ability to make capital distributions, including the payment of dividends, and to pay discretionary bonuses to executive officers. The capital buffer requirement is being phased-in over three years beginning in 2016.

The March 31, 2018 table below includes the 1.875% increase as of January 1, 2018 in the minimum capital requirement ratios. The capital buffer requirement effectively raises the minimum required Common Equity Tier 1 Capital ratio to 7.0%, the Tier 1 Capital ratio to 8.5%, and the Total Capital ratio

to 10.5% on a fully phased-in basis on January 1, 2019. As of March 31, 2018 and December 31, 2017, the Company was in compliance with the current phase of the Basel III Rule and management believes that the Company would meet all capital adequacy requirements under the Basel III Rule on a fully phased-in basis as if such requirements had been in effect (*dollars in thousands*).

	Actual		Minimum Capital Requirement with Capital Buffer		Minimum To Be Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2018:						
Total Capital (to Risk Weighted Assets)						
Consolidated	\$ 847,408	14.32%	\$ 584,466	9.875%	\$ 591,864	10.00%

Note 16: Operating Segments and Related Information

The Company has three reportable operating segments, Banking, Remittance Processing and Wealth Management. The Banking operating segment provides a full range of banking services to individual and corporate customers through its banking center network in Illinois, St. Louis, Missouri metropolitan area, southwest Florida and through its banking center in Indianapolis, Indiana. The Remittance Processing operating segment provides for online bill payments, lockbox and walk-in payments. The Wealth Management operating segment provides a full range of asset management, investment and fiduciary services to individuals, businesses and foundations, tax preparation, philanthropic advisory services and farm and brokerage services.

The Company's three operating segments are strategic business units that are separately managed as they offer different products and services and have different marketing strategies. The "other" category consists of the Parent Company and the elimination of intercompany transactions.

The segment financial information provided below has been derived from information used by management to monitor and manage the financial performance of the Company. The accounting policies of the three segments are the same as those described in the summary of significant accounting policies in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

36

Following is a summary of selected financial information for the Company's operating segments (*dollars in thousands*):

	Goodwill		Total Assets

Note 17: Derivative Financial Instruments

The Company originates and purchases derivative financial instruments, including interest rate lock commitments issued to residential loan customers for loans that will be held for sale, forward sales commitments to sell residential mortgage loans to loan investors, and interest rate swaps. See “Note 18: Fair Value Measurements” for further discussion of the fair value measurement of such derivatives.

Interest Rate Lock Commitments. At March 31, 2018 and December 31, 2017, the Company had issued \$72.1 million and \$51.7 million, respectively, of unexpired interest rate lock commitments to loan customers. Such interest rate lock commitments that meet the definition of derivative financial instruments under ASC Topic 815, Derivatives and Hedging, are carried at their fair values in other assets or other liabilities in the unaudited Consolidated Financial Statements, with changes in the fair values of the corresponding derivative financial assets or liabilities recorded as either a charge or credit to current earnings during the period in which the changes occurred.

Forward Sales Commitments. At March 31, 2018 and December 31, 2017, the Company had issued \$90.9 million and \$139.7 million, respectively, of unexpired forward sales commitments to mortgage loan investors. Typically, the Company economically hedges mortgage loans held for sale and interest rate lock commitments issued to its residential loan customers related to loans that will be held for sale by obtaining corresponding best-efforts forward sales commitments with an investor to sell the loans at an agreed-upon price at the time the interest rate locks are issued to the customers. Forward sales commitments that meet the definition of derivative financial instruments under ASC Topic 815, Derivatives and Hedging, are carried at their fair values in other assets or other liabilities in the unaudited Consolidated Financial Statements. While such forward sales commitments generally served as an economic hedge to the mortgage loans held for sale and interest rate lock commitments, the Company did not designate them for hedge accounting treatment. Consequently, changes in fair value of the corresponding derivative financial asset or liability were recorded as either a charge or credit to current earnings during the period in which the changes occurred.

The fair values of derivative assets and liabilities related to interest rate lock commitments and forward sales commitments recorded in the unaudited Consolidated Balance Sheets are summarized as follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
Fair value recorded in other assets	\$ 732	\$ 675
Fair value recorded in other liabilities	972	2,148

The gross gains and losses on these derivative assets and liabilities recorded in non-interest income and expense in the unaudited Consolidated Statements of Income for the three months ended March 31, 2018 and 2017 are summarized as follows (*dollars in thousands*):

	March 31, 2018	March 31, 2017
Gross gains	\$ 732	\$ 3,865
Gross (losses)	(1,054)	(3,791)
Net (losses) gains	<u>\$ (322)</u>	<u>\$ 74</u>

The impact of the net gains or losses on derivative financial instruments related to interest rate lock commitments issued to residential loan customers for loans that will be held for sale and forward sales commitments to sell residential mortgage loans to loan investors are almost entirely offset by a corresponding change in the fair value of loans held for sale.

Interest Rate Swaps. Beginning in the second quarter of 2017, the Company entered into interest rate swap contracts to manage the interest rate risk exposure associated with specific commercial loan relationships, at the time such loans were originated. The Company offsets each customer derivative with a bank counterparty. With a notional values of \$170.7 million and \$161.3 million at March 31, 2018 and December 31, 2017, respectively, these contracts support variable rate, commercial loan relationships totaling \$85.4 million and \$80.7 million, respectively. While these swap derivatives generally worked together as an economic interest rate hedge, the Company did not designate them for hedge accounting treatment. Consequently, changes in fair value of the corresponding derivative financial asset or liability were recorded as either a charge or credit to current earnings during the period in which the changes occurred.

38

The fair values of derivative assets and liabilities related to interest rate swaps recorded in the unaudited Consolidated Balance Sheets are summarized as follows (*dollars in thousands*):

	March 31, 2018	December 31, 2017
Fair value recorded in other assets	\$ 1,216	\$ 262
Fair value recorded in other liabilities	1,216	262

The gross gains and losses on derivative assets and liabilities related to interest rate swaps recorded in non-interest income and expense in the unaudited Consolidated Statements of Income for the three months ended March 31, 2018 are summarized as follows (*dollars in thousands*):

	March 31, 2018
Gross gains	\$ 954
Gross losses	(954)
Net gains (losses)	<u>\$ —</u>

First Busey had \$0.3 million in securities pledged to secure its obligation under these contracts at March 31, 2018. First Busey had \$2.0 million in cash and \$0.4 million in securities pledged to secure its obligation under contracts at December 31, 2017.

Note 18: Fair Value Measurements

The fair value of an asset or liability is the price that would be received by selling that asset or paid in transferring that liability (exit price) in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. ASC Topic 820, Fair Value Measurement, establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect the Company's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to those Company assets and liabilities that are carried at fair value.

There were no transfers between levels during the quarter ended March 31, 2018.

In general, fair value is based upon quoted market prices, when available. If such quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable data. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect, among other things, counterparty credit quality and the company's creditworthiness as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

39

Securities Available for Sale. Securities classified as available for sale are reported at fair value utilizing level 2 measurements. The Company obtains fair value measurements from an independent pricing service. The independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information. Because many fixed income securities do not trade on a daily basis, the independent pricing service applies available information, focusing on observable market data such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations.

The independent pricing service uses model processes, such as the Option Adjusted Spread model, to assess interest rate impact and develop prepayment scenarios. The models and processes take into account market conventions. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models.

The market inputs that the independent pricing service normally seeks for evaluations of securities, listed in approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. The independent pricing service also monitors market indicators, industry and economic events. For certain security types, additional inputs may be used or some of the market inputs may not be applicable. Evaluators may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs listed are available for use in the evaluation process for each security evaluation on a given day. Because the data utilized was observable, the securities have been classified as level 2 in ASC Topic 820.

Securities Equity Investments. Securities classified as equity investments are reported at fair value utilizing level 1 measurements. For mutual funds and other equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date and have been classified as level 1 in ASC Topic 820.

Loans held for sale. Loans held for sale are reported at fair value utilizing level 2 measurements. The fair value of the mortgage loans held for sale are measured using observable quoted market or contract prices or market price equivalents and are classified as level 2 in ASC Topic 820.

Derivative Assets and Derivative Liabilities. Derivative assets and derivative liabilities are reported at fair value utilizing level 2 measurements. The fair value of derivative assets and liabilities is determined based on prices that are obtained from a third-party which uses observable market inputs. Derivative assets and liabilities are classified as level 2 in ASC Topic 820.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2018 and December 31, 2017, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (*dollars in thousands*):

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
March 31, 2018				
Fair value adjusted through comprehensive income:				
Securities available for sale				
U.S. Treasury securities	\$ —	\$ 60,064	\$ —	\$ 60,064
Obligations of U.S. government corporations and agencies	—	96,193	—	96,193
Obligations of states and political subdivisions	—	260,990	—	260,990
Residential mortgage-backed securities	—	372,898	—	372,898
Corporate debt securities	—	31,956	—	31,956
Fair value adjusted through current period earnings:				
Securities equity investments	5,028	—	—	5,028
Loans held for sale	—	29,034	—	29,034
Derivative assets	—	1,948	—	1,948
Derivative liabilities	—	2,188	—	2,188

40

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
December 31, 2017				
Securities available for sale				
U.S. Treasury securities	\$ —	\$ 60,348	\$ —	\$ 60,348
Obligations of U.S. government corporations and agencies	—	103,665	—	103,665
Obligations of states and political subdivisions	—	280,199	—	280,199
Residential mortgage-backed securities	—	397,436	—	397,436
Corporate debt securities	—	31,034	—	31,034
Securities equity investments	5,378	—	—	5,378
Loans held for sale	—	94,848	—	94,848
Derivative assets	—	937	—	937
Derivative liabilities	—	2,410	—	2,410

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Impaired Loans. The Company does not record loans at fair value on a recurring basis. However, periodically, a loan is considered impaired and is reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Impaired loans measured at fair value typically consist of loans on non-accrual status and restructured loans in compliance with modified terms. Collateral values are estimated using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all impaired loan fair values have been classified as level 3 in ASC Topic 820.

OREO. Non-financial assets and non-financial liabilities measured at fair value include OREO (upon initial recognition or subsequent impairment). OREO properties are measured using a combination of observable inputs, including recent appraisals, and unobservable inputs based on customized discounting

criteria. Due to the significance of the unobservable inputs, all OREO fair values have been classified as level 3 in ASC Topic 820.

The following table summarizes assets and liabilities measured at fair value on a non-recurring basis as of March 31, 2018 and December 31, 2017, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (*dollars in thousands*):

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
March 31, 2018				
Impaired loans	\$ —	\$ —	\$ 2,499	\$ 2,499
OREO(1)	—	—	—	—
December 31, 2017				
Impaired loans	\$ —	\$ —	\$ 1,313	\$ 1,313
OREO(1)	—	—	—	—

(1)OREO fair value was less than one thousand dollars.

The following table presents additional quantitative information about assets measured at fair value on a non-recurring basis for which the Company has utilized level 3 inputs to determine fair value (*dollars in thousands*):

	Quantitative Information about Level 3 Fair Value Measurements			
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
March 31, 2018				
Impaired loans	\$ 2,499	Appraisal of collateral	Appraisal adjustments	-18.7% to -100.0% (-48.4)%
OREO(1)	—	Appraisal of collateral	Appraisal adjustments	-100.0% (-100.0)%
December 31, 2017				
Impaired loans	\$ 1,313	Appraisal of collateral	Appraisal adjustments	-20.3% to -100.0% (-30.8)%
OREO(1)	—	Appraisal of collateral	Appraisal adjustments	-100.0% (-100.0)%

(1)OREO fair value was less than one thousand dollars.

The estimated fair values of financial instruments that are reported at amortized cost in the Company's Consolidated Balance Sheets, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value, were as follows (*dollars in thousands*):

	March 31, 2018		December 31, 2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Level 1 inputs:				
Cash and cash equivalents	\$ 367,525	\$ 367,525	\$ 353,272	\$ 353,272

Level 3 inputs:				
Senior notes, net of unamortized issuance costs	39,438	38,477	39,404	39,104
Subordinated notes, net of unamortized issuance costs	64,684	63,366	64,715	64,350

(2)In connection with the adoption of ASU 2016-01 in 2018, only deposits with stated maturities are required to be disclosed.

ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

Note 19: Liability for Loans Sold

Under standard representations and warranties and early payment default clauses in the Company's mortgage sale agreements, the Company could be required to repurchase mortgage loans sold to investors or reimburse the investors for losses incurred on loans in the event of borrower default within a defined period after origination (generally 90 days), or in the event of breaches of contractual representations or warranties made at the time of sale that are not remedied within a defined period after the Company receives notice of such breaches (generally 90 days). In addition, the Company may be required to refund the profit received from the sale of a loan to an investor if the borrower pays off the loan within a defined period after origination, which is generally 120 days. The Company records an estimated liability for probable amounts due to the Company's loan investors under these obligations. This repurchase liability is determined based on a combination of factors including the volume of loans sold in current and previous periods; borrower default expectations; historical investor repurchase demand and appeals success rates; and estimated loss severity. Payments made to investors as reimbursement for losses incurred are charged against the mortgage repurchase liability. Loans repurchased from investors are initially recorded at fair value, which becomes the Company's new accounting basis. The difference between the loan's fair value and the payment made to investors as reimbursement for losses incurred is charged to the mortgage repurchase liability. Subsequent to repurchase, such loans are carried as portfolio loans on the Company's Consolidated Balance Sheets. Loans repurchased with deteriorated credit quality at the date of repurchase are accounted for under ASC Topic 310-30.

The liability for loans sold of \$2.2 million and \$2.1 million at March 31, 2018 and December 31, 2017, respectively, represents the Company's best estimate of the probable losses that the Company will incur for various early default provisions and contractual representations and warranties associated with the sales of mortgage loans and is included in other liabilities in the accompanying Consolidated Balance Sheets. Because the level of mortgage loan repurchase losses depends upon economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, the level of the liability for mortgage loan repurchase losses is difficult to estimate and requires considerable management judgment. In addition, the Company generally does not service the loans that it has sold to investors and is generally unable to track the remaining unpaid balances or delinquency status after sale. As a result, there may be a range of possible losses in excess of the estimated liability that cannot be estimated. Management maintains regular contact with the Company's investors to monitor and address their repurchase demand practices and concerns.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is management's discussion and analysis of the financial condition of First Busey at March 31, 2018 (unaudited), as compared with December 31, 2017 and March 31, 2017 (unaudited), and the results of operations for the three months ended March 31, 2018 (unaudited), as compared to the three months ended December 31, 2017 (unaudited) and March 31, 2017 (unaudited) when applicable. Management's discussion and analysis should be read in conjunction with the Company's unaudited Consolidated Financial Statements and notes thereto appearing elsewhere in this Quarterly Report on Form 10-Q, as well as the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

EXECUTIVE SUMMARY**Operating Results**

First Busey's net income for the first quarter of 2018 was \$21.9 million, or \$0.45 per diluted common share. The Company reported net income of \$12.3 million, or \$0.25 per diluted common share for the fourth quarter of 2017 and net income of \$15.2 million, or \$0.39 per diluted common share for the first quarter of 2017. Adjusted net income(1) for the first quarter of 2018 was \$24.9 million, or \$0.51 per diluted common share compared to \$22.5 million, or \$0.46 per diluted common share, for the fourth quarter of 2017 and \$15.8 million, or \$0.41 per diluted common share, for the first quarter of 2017.

In addition to the Company's organic growth, first quarter of 2018 results compared to the first quarter of 2017 benefitted from the acquisition of First Community, since the closing of the transaction on July 2, 2017 and Mid Illinois, since the closing of the transaction on October 1, 2017.

For the first quarter of 2018, return on average assets and return on average tangible common equity was 1.16% and 14.18%, respectively, on a basis in accordance with GAAP. Based on adjusted net income(1), return on average assets was 1.32% and return on average tangible common equity was 16.13% for the same period.

The Company views certain non-operating items including, but not limited to, acquisition and restructuring charges, as adjustments to net income. Non-operating adjustments for the first quarter of 2018 include \$1.7 million in compensation and severance and \$2.3 million in legal, data processing conversion and other expenses related to acquisitions. The reconciliation of non-GAAP measures (including adjusted net income, adjusted efficiency ratio, adjusted return on average assets ("ROA"), return on average tangible common equity, tangible book value and tangible book value per share), which the Company believes facilitates the assessment of its banking operations and peer comparability, is included in tabular form in this Quarterly Report on Form 10-Q in the "Non-GAAP Financial Information" section.

Revenues from trust fees, commissions and brokers' fees, and remittance processing activities represented 53.4% of the Company's non-interest income for the quarter ended March 31, 2018, providing a balance to revenue from traditional banking activities.

Trust fees and commissions and brokers' fees of \$8.6 million for the first quarter of 2018 increased from \$7.7 million for the fourth quarter of 2017 and \$6.9 million for the first quarter of 2017. Net income from the wealth management segment increased to \$2.8 million for the first quarter of 2018, compared to \$1.5 million or a notable 88.2% increase from the fourth quarter of 2017 and \$1.8 million or 49.6% increase from the first quarter of 2017. Market expansion and strong performance from Busey Ag Services, a wealth management division of Busey Bank, contributed to the positive results. Busey Wealth Management ended the first quarter of 2018 with \$6.9 billion in assets under care, a 15.9% increase from the fourth quarter of 2017 creating positive momentum going forward.

Remittance processing revenue of \$3.4 million for the first quarter of 2018 increased from \$2.8 million for the first and fourth quarters of 2017. Net income from the remittance processing segment was \$1.0 million for the first quarter of 2018, an increase from \$0.4 million for the fourth quarter of 2017 and \$0.6 million for the first quarter of 2017. The positive 2018 results are a reflection of new customer activity and volume increases from existing customers.

(1)For a reconciliation of adjusted net income, a non-GAAP financial measure, see “Non-GAAP Financial Information.”

We continue to focus on our Company’s organic growth and to evaluate and execute on acquisitions which fit our strategy. New partnerships with talented bankers in St. Louis, Peoria and the Chicagoland area bring an expanding pool of business opportunities to generate value and diversity across new markets.

Asset Quality

While much internal focus has been directed toward growth, the Company’s commitment to credit quality remains strong. As of March 31, 2018, the Company reported non-performing loans of \$33.6 million compared to \$27.4 million as of December 31, 2017. During the first quarter of 2018, the Company completed its integration of the First Community credit process and as a result, identified two former First Community large commercial relationships to be placed on non-accrual. The Company is actively working to resolve these relationships. Non-performing assets were 0.6% of total portfolio loans and non-performing assets as of March 31, 2018 compared to 0.5% as of December 31, 2017.

The Company recorded net charge-offs of \$1.9 million for the first quarter of 2018 compared to net charge-offs of \$0.3 million for the fourth quarter of 2017. The allowance for loan losses as a percentage of portfolio loans was 0.95% at March 31, 2018 compared to 0.97% at December 31, 2017. As a result of acquisitions, the Company is holding acquired loans that are carried net of a fair value adjustment for credit and interest rate marks and are only included in the allowance calculation to the extent that the reserve requirement exceeds the fair value adjustment. The Company recorded a provision for loan losses of \$1.0 million in the first quarter of 2018, compared to \$2.8 million in the fourth quarter of 2017 and \$0.5 million in the first quarter of 2017.

With a continued commitment to asset quality and the strength of our Consolidated Balance Sheet, near-term loan losses are expected to remain generally low. While these results are encouraging, asset quality metrics can be generally influenced by market-specific economic conditions, and specific measures may fluctuate from quarter to quarter.

The key metrics are as follows (*dollars in thousands*):

	As of and for the Three Months Ended			
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017
Portfolio loans	\$ 5,531,453	\$ 5,519,500	\$ 5,085,864	\$ 3,920,464
Commercial loans(1)	4,061,181	4,030,821	3,782,463	2,828,261
Allowance for loan losses	52,649	53,582	51,035	49,201
Non-performing loans				
Non-accrual loans	32,588	24,624	27,430	18,935
Loans 90+ days past due	995	2,741	439	1,123
Loans 30-89 days past due	9,506	12,897	11,556	6,953
OREO	1,001	1,283	1,172	480
Non-performing assets to portfolio loans and non- performing assets	0.6%	0.5%	0.6%	0.5%
Allowance as a percentage of non-performing loans	156.8%	195.80%	183.1%	245.3%
Allowance for loan losses to portfolio loans	0.95%	0.97%	1.0%	1.3%

(1)Includes loans categorized as commercial, commercial real estate and real estate construction.

Economic Conditions of Markets

The Company has 44 banking centers serving Illinois. Our primary downstate Illinois markets of Champaign, Macon, McLean and Peoria counties are anchored by several strong, well-recognized and stable organizations. Those organizations, coupled with a large agricultural sector, anchor the communities in which they are located, and have provided a comparatively stable foundation for housing, employment and small business. The First Community acquisition provided the Company entrance into the demographically and economically attractive southwest suburban markets of the greater Chicagoland area and is part of the Company’s strategy of expanding into markets with both population and commercial density in the Midwest.

The State of Illinois, where a large portion of the Company’s customer base is located, continues to be one of the most troubled of any state in the United States with pension under-funding, continued budget deficits and a declining credit outlook. Additionally, the Company is located in markets with significant universities and healthcare companies, which rely heavily on state funding and contracts. Any possible payment lapses by the State of Illinois to its vendors and government sponsored entities may have negative effects on our primary market areas.

Busey Bank has 13 banking centers serving the St. Louis metropolitan area, all of which are located in the city of St. Louis, or the adjacent counties of St. Louis County and St. Charles County. St. Louis, Missouri is the largest metropolitan area in Missouri and the twentieth largest in the United States. The bi-state metropolitan area includes seven counties in Missouri and eight counties in Illinois. The Company’s geographic concentration in only three of the 15 counties included in the St. Louis metropolitan area gives the Company tremendous expansion opportunities into neighboring counties. St. Louis has a diverse economy with its major employment sectors including health care, financial services, professional and business services, and retail. St. Charles

County has been one of the fastest-growing counties in the country for decades and features a cross-section of industry, as well as extensive retail and some agriculture.

Busey Bank has five banking centers in southwest Florida. Southwest Florida has shown continuing signs of improvement in areas such as job growth and the housing market over the last several years.

Busey Bank has one banking center in the Indianapolis, Indiana area, which is the most populous city of Indiana with a diverse economy. Many large corporations are headquartered in Indianapolis and it is host to numerous conventions and sporting events annually.

OPERATING PERFORMANCE

Net interest income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is tax-equivalent net interest income as a percent of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes an income tax rate of 26% in 2018 and 35% in 2017. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

The following tables show our Consolidated Average Balance Sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the periods shown. The tables also show, for the periods indicated, a summary of the changes in interest earned and interest expense resulting from changes in volume and rates for the major components of interest-earning assets and interest-bearing liabilities. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately, based on changes due to rate and changes due to volume. All average information is provided on a daily average basis.

CONSOLIDATED AVERAGE BALANCE SHEETS AND INTEREST RATES THREE MONTHS ENDED MARCH 31, 2018 AND 2017 (UNAUDITED)

(1)On a tax-equivalent basis assuming an income tax rate of 26% in 2018 and 35% in 2017.

(2)Non-accrual loans have been included in average portfolio loans.

(3)Interest income includes a tax-equivalent adjustment of \$0.8 million and \$0.7 million at March 31, 2018 and 2017, respectively.

(4)Includes federal funds purchased, FHLB advances and revolving loan. Interest expense includes a non-usage fee on the revolving loan.

(5)Includes FHLB long-term debt, senior notes and subordinated notes.

(6)Annualized.

47

The Consolidated Average Balance Sheets and interest rates were impacted by the 2017 acquisitions of First Community and Mid Illinois, along with organic growth. Total average interest-earning assets increased \$2.1 billion, or 42.3%, to \$7.0 billion for the three month period ended March 31, 2018, as compared to \$4.9 billion for the same period in 2017. Loans generally have notably higher yields compared to interest-bearing bank deposits and investment securities and our loan growth contributed to a positive effect on net interest margin. Total average interest-bearing liability balances increased \$1.6 billion, or 44.2%, to \$5.2 billion for the three month period ended March 31, 2018, as compared to \$3.6 billion for the same period in 2017.

Interest income, on a tax-equivalent basis, increased \$23.7 million, or 52.1%, to \$69.4 million for the three month period ended March 31, 2018, as compared to \$45.7 million in the same period of 2017. The interest income increase related primarily to the increase in loan volumes. Interest expense increased during the three month period ended March 31, 2018 by \$6.0 million to \$8.9 million from \$2.9 million in the same period of 2017. The interest expense increase was primarily the result of the increase in deposits and borrowings related to the 2017 acquisitions of First Community and Mid Illinois.

Net interest income, on a tax-equivalent basis, increased \$18.0 million for the three month period ended March 31, 2018, as compared to the same period of 2017. The Federal Open Market Committee announced on March 21, 2018 that the federal funds rate increased from 1.50% to 1.75%. The Company expects this increase in interest rates to be modestly favorable to net interest income in 2018; however, rising interest rates could result in decreased demand for first mortgages as well as mortgage refinancing, activities which contribute to a portion of the Company's mortgage revenue.

Net interest margin

Net interest margin, our net interest income expressed as a percentage of average earning assets stated on a tax-equivalent basis, was 3.52% for the three month period ended March 31, 2018, compared to 3.53% for the same period in 2017. Net of purchase accounting accretion and amortization(1), the net interest margin for the three month period ended March 31, 2018 was 3.32%, a decrease from 3.38% for the same period in 2017. Changes in net interest margin were driven by the pricing on deposits obtained through the Mid Illinois acquisition.

Quarterly net interest margins for 2018 and 2017 were as follows:

	2018	2017
First Quarter	3.52%	3.53%
Second Quarter	—	3.47%
Third Quarter	—	3.60%
Fourth Quarter	—	3.68%

The net interest spread, which represents the difference between the average rate earned on earning assets and the average rate paid on interest-bearing liabilities, also on a tax-equivalent basis, was 3.33% for the three month period ended March 31, 2018, compared to 3.44% for the same period in 2017.

Management attempts to mitigate the effects of the interest-rate environment through effective portfolio management, prudent loan underwriting and operational efficiencies. Please refer to the Notes to Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2017 for accounting policies underlying the recognition of interest income and expense.

(1)For a reconciliation of net interest margin net of purchase accounting accretion and amortization, see "Non-GAAP Financial Information."

48

Non-interest income (dollars in thousands):

	Three Months Ended March 31,			
	2018	2017	\$ Change	% Change
Trust fees	\$ 7,514	\$ 6,190	\$ 1,324	21.4%
Commissions and brokers' fees, net	1,096	722	374	51.8%
Remittance processing	3,392	2,845	547	19.2%
Fees for customer services	6,946	5,986	960	16.0%
Mortgage revenue	1,643	2,134	(491)	(23.0)%
Security gains, net	—	857	(857)	(100.0)%
Other income	1,895	1,280	615	48.0%
Total non-interest income	<u>\$ 22,486</u>	<u>\$ 20,014</u>	<u>\$ 2,472</u>	<u>12.4%</u>

Total non-interest income of \$22.5 million for the three month period ended March 31, 2018 increased by 12.4% as compared to \$20.0 million for the same period in 2017. The increase reflects organic growth as well as the 2017 acquisitions of First Community and Mid Illinois.

Combined Wealth Management revenue, consisting of trust fees and commissions and brokers' fees, net, increased to \$8.6 million for the three months ended March 31, 2018 compared to \$6.9 million for the three months ended March 31, 2017. Market expansion and increasing assets under care drove fee income. Further, two of the Company's acquisitions, Pulaski and First Community, had no legacy fee income in these businesses; therefore, the addition of these fee-based service offerings in these acquired bank markets is expected to provide attractive growth opportunities in future periods.

Remittance processing revenue of \$3.4 million for the three months ended March 31, 2018 increased compared to \$2.8 million for the same period of 2017. Remittance processing adds important diversity to our revenue stream while widening our array of service offerings to larger commercial clients within our footprint and nationally.

Fees for customer services increased to \$6.9 million for the three month period ended March 31, 2018 as compared to \$6.0 million for the same period of 2017. Evolving regulation, product changes and changing behaviors by our client base may cause modest fluctuations in the revenue derived from charges on deposit accounts.

Mortgage revenue decreased to \$1.6 million for the three month period ended March 31, 2018 compared to \$2.1 million for the same period of 2017. The first quarter of 2018 reflected the realignment of mortgage origination resources to the Company's current market through the sale of certain mortgage locations in the fourth quarter of 2017.

Security gains, net, vary based on the Company's decisions around selling securities. In the first quarter of 2017, the Company sold 100% risk weighted investments and reinvested in 20% risk weighted investments at higher yields to better manage capital, while also producing higher future returns.

Other income increased 48.0% for the three months ended March 31, 2018 compared to the same period of 2017 across multiple revenue sources.

49

Non-interest expense (dollars in thousands):

	Three Months Ended March 31,			
	2018	2017	\$ Change	% Change
Salaries, wages and employee benefits	\$ 28,819	\$ 21,890	\$ 6,929	31.7%
Net occupancy expense of premises	3,821	3,185	636	20.0%
Furniture and equipment expenses	1,913	1,619	294	18.2%
Data processing	5,231	3,598	1,633	45.4%
Amortization of intangible assets	1,515	1,207	308	25.5%
Other expense	9,741	6,120	3,621	59.2%
Total non-interest expense	<u>\$ 51,040</u>	<u>\$ 37,619</u>	<u>\$ 13,421</u>	<u>35.7%</u>
Income taxes	\$ 8,278	\$ 8,738	\$ (460)	(5.3)%
Effective rate on income taxes	27.4%	36.5%		
Efficiency ratio	59.7%	58.8%		
Full-time equivalent employees as of period-end	<u>1,278</u>	<u>1,251</u>		

Total non-interest expense of \$51.0 million for the three month period ended March 31, 2018 increased by \$13.4 million as compared to \$37.6 million for the same period in 2017. Pre-tax non-operating expenses of \$3.5 million impacted the first quarter of 2018 while pre-tax non-operating expenses of \$1.0 million impacted the first quarter of 2017. We continue to examine expenses across all areas of the Company and remain focused on expense discipline, with an emphasis on the ones outlined below.

Salaries, wages and employee benefits expense of \$28.8 million increased \$6.9 million for the three month period ended March 31, 2018 as compared to the same period in 2017, primarily as a result of an increased number of employees resulting from the First Community and Mid Illinois acquisitions. In addition, the first quarter of 2018 was negatively impacted by \$1.7 million in restructuring costs designed to address the changing needs of our organization as we seek to balance growth with efficiency. Full-time equivalent employees totaled 1,278 at March 31, 2018, down from 1,347 at December 31, 2017, and up from 1,251 at March 31, 2017.

Combined net occupancy expense of premises and furniture and equipment expenses of \$5.7 million for the three month period ended March 31, 2018, increased compared to \$4.8 million in the same period in 2017. The 2017 acquisitions added 21 banking centers. We continue to evaluate our banking center

network and five banking centers were closed in the first quarter of 2018.

Data processing expense for the three month period ended March 31, 2018 of \$5.2 million increased from \$3.6 million for the same period of 2017. Variances are largely related to payment of deconversion expenses related to acquisitions.

Amortization of intangible assets increased for the three month period ended March 31, 2018 compared to the same period in 2017 as a result of the First Community and Mid Illinois acquisitions.

Other expense of \$9.7 million for the three month period ended March 31, 2018 increased \$3.6 million compared to the same period in 2017. Variances are across multiple expense categories, including fees around acquisitions.

The effective rate on income taxes, or income taxes divided by income before taxes, of 27.4% for the three months ended March 31, 2018, was lower than the combined federal and state statutory rate of approximately 28% due to tax preferred interest income, such as municipal bond interest and bank owned life insurance income, accounting for a portion of our taxable income. The effective tax rate for the first quarter of 2018 also included the tax impact of the sale of certain assets in conjunction with the Mid Illinois acquisition. Effective July 1, 2017, the combined Illinois corporate income tax rate and replacement tax rate increased from 7.75% to 9.50%. Effective January 1, 2018 in connection with the TCJA, the corporate federal tax rate was reduced from 35.0% to 21.0%.

The efficiency ratio(1) represents total non-interest expense, less amortization charges, as a percentage of tax-equivalent net interest income plus non-interest income, less security gains and losses. The efficiency ratio, which is a measure commonly used by management and the investment community in the banking industry, measures the amount of expense that is incurred to generate a dollar of revenue. The efficiency ratio of 59.7% for the three month period ended March 31, 2018 increased from 58.8% in the comparable period in 2017. Operating costs have been influenced by acquisitions and the adjusted efficiency ratio(1), excluding the impact of such acquisition costs among other items, was 55.4% and 57.3% for the three month periods ended March 31, 2018 and 2017, respectively. While acquisition expenses may have a negative impact on the efficiency ratios, the Company expects to realize operating efficiencies creating a positive impact in future years. Further, the Company expects to see greater operating efficiencies from the South Side integration beginning in the second quarter of 2018. We will continue to examine appropriate avenues to improve efficiency.

(1)For a reconciliation of efficiency ratio and adjusted efficiency ratio, non-GAAP financial measures, see “Non-GAAP Financial Information.”

FINANCIAL CONDITION

Significant Consolidated Balance Sheet items (dollars in thousands):

	March 31, 2018	December 31, 2017	\$ Change	% Change
Assets

Stockholders' equity	\$ 942,146	\$ 935,003	\$ 7,143	0.8%

In the first quarter of 2018, we continued to emphasize our key priorities - balance sheet strength, profitability and growth -achieved within a framework of safety and soundness. Our capital position remains strong and we continue to focus on a sound credit foundation. We believe our emphasis on commercial banking and wealth management, supplemented by our remittance processing activities, will drive growth in 2018 and beyond.

Loans Held for Sale

Loans held for sale totaled \$29.0 million and \$94.8 million at March 31, 2018 and December 31, 2017, respectively. The amount of loans held for sale decreased from December 31, 2017, due to lower origination volumes in 2018. Loans held for sale generate net interest income until loans are delivered to investors, at which point mortgage revenue will be recognized.

Portfolio Loans

Geographic distributions of portfolio loans by category were as follows (*dollars in thousands*):

	March 31, 2018				Total

Portfolio loans, net					<u>\$ 5,465,918</u>

Portfolio loans increased \$12.0 million, or 0.2%, as of March 31, 2018 compared to December 31, 2017. Commercial balances (consisting of commercial, commercial real estate and real estate construction loans) increased \$30.4 million from December 31, 2017. Retail real estate and retail other loans decreased \$18.4 million from December 31, 2017. First quarter 2018 loan growth was driven by organic originations, particularly in the Missouri market. Relationship banking, rather than transactional banking, remains a focus for the Company. Relationship banking implies a primary banking relationship with the borrower that includes, at minimum, an active deposit banking relationship in addition to the lending relationship.

Allowance for Loan Losses

Our allowance for loan losses was \$52.6 million, or 0.95% of portfolio loans, and \$53.6 million, or 0.97% of portfolio loans, at March 31, 2018 and December 31, 2017, respectively. As of March 31, 2018, management believed the level of the allowance and coverage of non-performing loans to be appropriate based upon the information available. However, additional losses may be identified in our loan portfolio as new information is obtained. We may need to provide for additional loan losses in the future as management continues to identify potential problem loans and gains further information concerning existing problem loans.

Provision for Loan Losses

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an appropriate allowance for known and probable losses in the loan portfolio. In assessing the appropriateness of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge-off a loan balance, a write-off is charged against the allowance for loan losses. We continue to attempt to identify problem loan situations on a proactive basis. Once problem loans are identified, adjustments to the provision for loan losses are made based upon all information available at that time.

The provision for loan losses was \$1.0 million and \$0.5 million at March 31, 2018 and 2017, respectively. As a result of acquisitions, the Company is holding acquired loans that are carried net of a fair value adjustment for credit and interest rate marks and are only included in the allowance calculation to the extent that the reserve requirement exceeds the fair value adjustment. However, as the acquired loans renew and as the Company originates new loan production, it is necessary to establish an allowance for losses, which represents an amount that, in management's opinion, will be adequate to absorb probable credit losses.

Sensitive assets include non-accrual loans, loans on our classified loan reports and other loans identified as having more than reasonable potential for loss. Management reviews sensitive assets on at least a quarterly basis for changes in each applicable customer's ability to pay and changes in valuation of underlying collateral in order to estimate probable losses. The majority of these loans are being repaid in conformance with their contracts.

Non-performing Loans

Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management's opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Typically, loans are collateral dependent. When a collateral dependent loan is classified as non-accrual it is charged down through the allowance for loan losses to the fair value of our interest in the underlying collateral less estimated costs to sell. Our loan portfolio is collateralized primarily by real estate.

The following table sets forth information concerning non-performing loans as of each of the dates indicated (*dollars in thousands*):

	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017
Non-accrual loans	\$ 32,588	\$ 24,624	\$ 27,430	\$ 20,544
Loans 90+ days past due and still accruing	995	2,741	439	311
Total non-performing loans	\$ 33,583	\$ 27,365	\$ 27,869	\$ 20,855
OREO	\$ 1,001	\$ 1,283	\$ 1,172	\$ 739
Total non-performing assets	\$ 34,584	\$ 28,648	\$ 29,041	\$ 21,594
Allowance for loan losses	\$ 52,649	\$ 53,582	\$ 51,035	\$ 48,442
Allowance for loan losses to portfolio loans	0.95%	0.97%	1.00%	1.25%
Allowance for loan losses to non-performing loans	156.8%	195.8%	183.1%	232.3%
Non-performing loans to portfolio loans, before allowance for loan losses	0.6%	0.5%	0.5%	0.5%
Non-performing loans and OREO to portfolio loans, before allowance for loan losses	0.6%	0.5%	0.6%	0.6%

Total non-performing assets were \$34.6 million at March 31, 2018, compared to \$28.6 million at December 31, 2017. Non-performing assets as a percentage of total loans and non-performing assets continued to be favorably low at 0.6% on March 31, 2018. Asset quality metrics can be generally influenced by market-specific economic conditions beyond the control of the Company, and specific measures may fluctuate from quarter to quarter.

53

Potential Problem Loans

Potential problem loans are those loans which are not categorized as impaired, restructured, non-accrual or 90+ days past due, but where current information indicates that the borrower may not be able to comply with present loan repayment terms. Management assesses the potential for loss on such loans as it would with other problem loans and has considered the effect of any potential loss in determining its provision for probable loan losses. Potential problem loans totaled \$88.2 million at March 31, 2018, compared to \$70.4 million at December 31, 2017. Management continues to monitor these credits and anticipates that restructurings, guarantees, additional collateral or other planned actions will result in full repayment of the debts. As of March 31, 2018, management identified no other loans that represent or result from trends or uncertainties which management reasonably expected to materially impact future operating results, liquidity or capital resources.

LIQUIDITY

Liquidity management is the process by which we ensure that adequate liquid funds are available to meet the present and future cash flow obligations arising in the daily operations of our business. These financial obligations consist of needs for funds to meet commitments to borrowers for extensions of credit, fund capital expenditures, honor withdrawals by customers, pay dividends to stockholders and pay operating expenses. Our most liquid assets are cash and due from banks, interest-bearing bank deposits and federal funds sold. The balances of these assets are dependent on the Company's operating, investing, lending, and financing activities during any given period.

First Busey's primary sources of funds consist of deposits, investment maturities and sales, loan principal repayments, and capital funds. Additional liquidity is provided by the ability to borrow from the FHLB, the Federal Reserve, First Busey's revolving loan facility, or to utilize brokered deposits.

As of March 31, 2018, management believed that adequate liquidity existed to meet all projected cash flow obligations. We seek to achieve a satisfactory degree of liquidity by actively managing both assets and liabilities. Asset management guides the proportion of liquid assets to total assets, while liability management monitors future funding requirements and prices liabilities accordingly.

OFF-BALANCE-SHEET ARRANGEMENTS

At March 31, 2018 and December 31, 2017 the Company had outstanding standby letters of credit of \$35.5 million and \$37.2 million, respectively, and commitments to extend credit of \$1.4 billion and \$1.3 billion, respectively, to its customers. Since these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. These commitments are made in the ordinary course of business to meet the financing needs of the Company's customers. As of March 31, 2018, no amounts were recorded as liabilities for the Company's potential obligations under these commitments.

CAPITAL RESOURCES

Our capital ratios are in excess of those required to be considered "well-capitalized" pursuant to applicable regulatory guidelines. The Federal Reserve Board uses capital adequacy guidelines in its examination and regulation of bank holding companies and their subsidiary bank. Risk-based capital ratios are established by allocating assets and certain off-balance-sheet commitments into risk-weighted categories. These balances are then multiplied by the factor appropriate for that risk-weighted category. For 2018, the guidelines, including the capital conservation buffer, required bank holding companies and their subsidiary bank to maintain a total capital to total risk-weighted asset ratio of not less than 9.875%, Tier 1 capital to total risk-weighted asset ratio of not less than 7.875%, Common Equity Tier 1 capital to total risk-weighted asset ratio of not less than 6.375% and a Tier 1 leverage ratio of not less than 4.00%. These minimum capital requirements will increase annually until the Basel III Rule is fully phased-in on January 1, 2019. As of March 31, 2018, First Busey had a total capital to total risk-weighted asset ratio of 14.32%, a Tier 1 capital to risk-weighted asset ratio of 12.32%, Common Equity Tier 1 capital to risk-weighted asset ratio of 11.07% and a Tier 1 leverage ratio of 9.89%; Busey Bank had ratios of 13.77%, 12.87%, 12.87% and 10.31%, respectively.

NON-GAAP FINANCIAL INFORMATION

This Quarterly Report on Form 10-Q contains certain financial information determined by methods other than in accordance with GAAP. These measures include adjusted net income, adjusted ROA, adjusted net interest margin, adjusted efficiency ratio, tangible common equity, tangible common equity to tangible assets and return on average common equity. Management uses these non-GAAP measures, together with the related GAAP measures, to analyze the Company's performance and to make business decisions. Management also uses these measures for peer comparisons.

A reconciliation to what management believes to be the most direct compared GAAP financial measures, specifically net income in the case of adjusted net income and adjusted ROA, total net interest income, total non-interest income and total non-interest expense in the case of adjusted efficiency ratio and total stockholders' equity in the case of the tangible book value per share, appears below (*dollars in thousands, except per share data*). The Company believes each of the adjusted measures is useful for investors and management to understand the effects of certain non-interest items and provides additional perspective on the Company's performance over time as well as comparison to the Company's peers.

These non-GAAP disclosures have inherent limitations and are not audited. They should not be considered in isolation or as a substitute for the results reported in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Tax effected numbers included in these non-GAAP disclosures are based on estimated statutory rates.

FORWARD-LOOKING STATEMENTS

Statements made in this report, other than those concerning historical financial information, may be considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, plans, objectives, future performance and business of First Busey. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of First Busey's management and on information currently available to management, are generally identifiable by the use of words such as "believe," "expect," "anticipate," "plan," "intend," "estimate," "may," "will," "would," "could," "should" or other similar expressions. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and we undertake no obligation to update any statement in light of new information or future events. A number of factors, many of which are beyond our ability to control or predict, could cause actual results to differ materially from those in our forward-looking statements. These factors include, among others, the following: (i) the strength of the local, national and international economy; (ii) changes in state and federal laws, regulations and governmental policies concerning First Busey's general business; (iii) changes in interest rates and prepayment rates of First Busey's assets; (iv) increased competition in the financial services sector and the inability to attract new customers; (v) changes in technology and the ability to develop and maintain secure and reliable electronic systems; (vi) the loss of key executives or employees; (vii) changes in consumer spending; (viii) unexpected results of current and/or future acquisitions, which may include failure to realize the anticipated benefits of any acquisition and the possibility that transaction costs may be greater than anticipated; (ix) unexpected outcomes of existing or new litigation involving First Busey; (x) the economic impact of any future terrorist threats or attacks; (xi) the economic impact of exceptional weather occurrences such as tornadoes, hurricanes, floods, and blizzards; and (xii) changes in accounting policies and practices. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Additional information concerning First Busey and its business, including additional factors that could materially affect its financial results, is included in First Busey's filings with the Securities and Exchange Commission.

57

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those that are critical to the portrayal and understanding of First Busey's financial condition and results of operations and require management to make assumptions that are difficult, subjective or complex. These estimates involve judgments, assumptions and uncertainties that are susceptible to change. In the event that different assumptions or conditions were to prevail, and depending on the severity of such changes, the possibility of a materially different financial condition or materially different results of operations is a reasonable likelihood. Further, changes in accounting standards could impact the Company's critical accounting estimates.

Our significant accounting policies are described in Note 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2017. The majority of these accounting policies do not require management to make difficult, subjective or complex judgments or estimates or the variability of the estimates is not material. However, the following policies could be deemed critical:

Fair Value of Available for Sale Investment Securities. Securities are classified as available for sale when First Busey determines it is possible the securities could be sold in the future due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. Securities classified as available for sale are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income (loss). For securities classified as available for sale, fair value measurements from an independent pricing service are based on observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things.

Realized securities gains or losses are reported in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. Declines in the fair value of securities below their amortized cost are evaluated to determine whether they are temporary or OTTI. If the Company (a) has the intent to sell a debt security or (b) will more-likely-than-not be required to sell the debt security before its anticipated recovery, then the Company recognizes the entire decline in fair value as an OTTI loss. If neither of these conditions are met, the Company evaluates whether a credit loss exists. The decline in fair value is separated into the amount of impairment related to the credit loss and the amount of impairment related to all other factors. The amount of the impairment related to credit loss is recognized in earnings, and the amount of impairment related to all other factors is recognized in other comprehensive income (loss).

The Company also evaluates whether the decline in fair value of an equity security is temporary or OTTI. In determining whether an unrealized loss on an equity security is temporary or OTTI, management considers various factors including the magnitude and duration of the impairment, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to hold the equity security to forecasted recovery.

Fair Value of Assets Acquired and Liabilities Assumed in Business Combinations. Business combinations are accounted for using the acquisition method of accounting. Under the acquisition method of accounting, assets acquired and liabilities assumed are recorded at their estimated fair value on the date of acquisition. Fair values are determined based on the definition of fair value defined in FASB ASC Topic 820 — Fair Value Measurement as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."

The fair value of a loan portfolio acquired in a business combination generally requires greater levels of management estimates and judgment than other assets acquired or liabilities assumed. At the date of acquisition, when loans have evidence of credit deterioration since origination and it is probable that the Company will not collect all contractually required principal and interest payments, the difference between contractually required payments and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference. At each future reporting date, the Company re-estimates the expected cash flows of the loans. Subsequent decreases in the expected cash flows will generally result in a provision for loan losses. Subsequent increases in the expected cash flows will generally be offset against the allowance for loan losses to the extent an allowance has been established or will be recognized as interest income prospectively.

Allowance for Loan Losses. First Busey has established an allowance for loan losses which represents its estimate of the probable losses inherent in the loan portfolio as of the date of the unaudited Consolidated Financial Statements and reduces the total loans outstanding by an estimate of uncollectible loans. Loans deemed uncollectible are charged against and reduce the allowance. A provision for loan losses is charged to current expense and acts to replenish the allowance for loan losses in order to maintain the allowance at a level that management deems adequate. Acquired loans from business combinations with uncollected principal balances are carried net of a fair value adjustment for credit and interest rates. These loans are only included in the allowance calculation to the extent that the reserve requirement exceeds the fair value adjustment. However, as the acquired loans renew, it is generally necessary to establish an allowance which represents an amount that, in management's opinion, will be adequate to absorb probable credit losses in such loans.

To determine the adequacy of the allowance for loan losses, a formal analysis is completed quarterly to assess the risk within the loan portfolio. This assessment is reviewed by the Company's senior management. The analysis includes a review of historical performance, dollar amount and trends of past due loans, dollar amount and trends in non-performing loans, certain impaired loans, and loans identified as sensitive assets. Sensitive assets include non-accrual loans, past-due loans, loans on First Busey's watch loan reports and other loans identified as having probable potential for loss.

The allowance consists of specific and general components. The specific component considers loans that are classified as impaired. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying amount of that loan. The general component covers non-classified loans and classified loans not considered impaired, and is based on historical loss experience adjusted for qualitative factors. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss experience.

A loan is considered to be impaired when, based on current information and events, it is probable First Busey will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreement. When a loan becomes impaired, management generally calculates the impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate. If the loan is collateral dependent, the fair value of the collateral is used to measure the amount of impairment. The amount of impairment and any subsequent changes are recorded through a charge to the provision for loan losses. For collateral dependent loans, First Busey has determined the required allowance on these loans based upon the estimated fair value, net of selling costs, of the applicable collateral. The required allowance or actual losses on these impaired loans could differ significantly if the ultimate fair value of the collateral is significantly different from the fair value estimates used by First Busey in estimating such potential losses.

Market risk is the risk of changes in asset values due to movements in underlying market rates and prices. Interest rate risk is a type of market risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting First Busey as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, have minimal impact or do not arise in the normal course of First Busey's business activities.

First Busey has an asset-liability committee, whose policy is to meet at least quarterly, to review current market conditions to attempt to structure the Consolidated Balance Sheets to ensure stable net interest income despite potential changes in interest rates.

As interest rate changes do not impact all categories of assets and liabilities equally or simultaneously, the asset-liability committee primarily relies on balance sheet and income simulation analysis to determine the potential impact of changes in market interest rates on net interest income. In these standard simulation models, the balance sheet is projected over a year-one time horizon and a year-two time horizon, and net interest income is calculated under current market rates and then assuming permanent instantaneous shifts of +/-100, +200, +300 and +400 basis points. Management measures such changes assuming immediate and sustained shifts in the federal funds rate and other market rate indices and the corresponding shifts in other non-market rate indices based on their historical changes relative to changes in the federal funds rate and other market indices. The model assumes assets and liabilities remain constant at the measurement date balances. The model uses repricing frequency on all variable-rate assets and liabilities. Prepayment speeds on loans have been adjusted to incorporate expected prepayment speeds in both a declining and rising rate environment.

59

Utilizing this measurement concept, the interest rate risk of First Busey due to an immediate and sustained change in interest rates, expressed as a change in net interest income as a percentage of the net interest income calculated in the constant base model, was as follows:

	Year-One: Basis Point Changes				
	-100	+100	+200	+300	+400
March 31, 2018	(4.99)%	1.26%	2.36%	3.47%	4.68%
December 31, 2017	0.34%	(0.72)%	(1.61)%	(2.56)%	(3.52)%
	Year-Two: Basis Point Changes				
	-100	+100	+200	+300	+400
March 31, 2018	(6.20)%	1.75%	3.42%	5.03%	6.53%
December 31, 2017	(2.65)%	1.53%	2.91%	4.14%	5.22%

Interest rate risk is monitored and managed within approved policy limits. The calculation of potential effects of hypothetical interest rate changes is based on numerous assumptions and should not be relied upon as indicative of actual results. Actual results will likely differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies. The above results do not take into account any management action to mitigate potential risk.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was carried out as of March 31, 2018, under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer and several other members of our senior management. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2018, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

During the quarter ended March 31, 2018, First Busey did not make any changes in its internal control over financial reporting or other factors that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

As part of the ordinary course of business, First Busey and its subsidiaries are parties to litigation that is incidental to their regular business activities.

There is no material pending litigation, other than ordinary routine litigation incidental to its business, in which First Busey or any of its subsidiaries is involved or of which any of their property is the subject. Furthermore, there is no pending legal proceeding that is adverse to First Busey in which any director, officer or affiliate of First Busey, or any associate of any such director or officer, is a party, or has a material interest.

60

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in Item 1A of Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On February 3, 2015, First Busey's board of directors authorized the Company to repurchase up to an aggregate of 666,667 shares of its common stock. The repurchase plan has no expiration date and replaced the prior repurchase plan that was originally approved in 2008. There were no purchases made by or on behalf of First Busey of shares of its common stock during the quarter ended March 31, 2018. At March 31, 2018, the Company had 333,334 shares that may still be purchased under the plan.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Van A. Dukeman, President and Chief Executive Officer of First Busey Corporation, certify that:

- 1) I have reviewed this Quarterly Report on Form 10-Q of First Busey Corporation;
- 2) Based on my knowledge, this Quarterly Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Quarterly Report;
- 3) Based on my knowledge, the Financial Statements, and other financial information included in this Quarterly Report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this Quarterly Report;
- 4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this Quarterly Report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this Quarterly Report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this Quarterly Report based on such evaluation; and
 - d) disclosed in this Quarterly Report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
